ANNUAL REPORT
of the
JOINT STANDING COMMITTEE ON FINANCE

DOVER, N. H., December 31, 1937.

TO THE CITY COUNCILS OF THE CITY OF DOVER, N. H.:

The undersigned, joint standing committee on finance of the City of Dover, have examined the books and accounts of the City Treasurer, Margaret M. Redden, and compared the footings of the receipts and disbursements with the accounts of the City Clerk, and find the same in agreement.

We have carefully examined and verified all bonds, securities and trust fund accounts belonging to the city, and are satisfied that all funds and other property for which the City Treasurer is officially responsible are accounted for, leaving a cash balance in banks to the credit of the City Proper of \$19,691.22.

A complete list of bonds and securities above referred to is hereto appended.

Respectfully submitted,

JAMES P. KEENAN,
CHARLES J. MANUEL,
W. C. BOWLES,
WALTER A. CHENEY,
MARK J. PILGRIM,

Joint Standing Committee on Finance
of the City of Dover, N. H.

Paid city treasurer	\$	1,112.70

Respectfully submitted,

FRANK F. DAVIS,
City Clerk.

Dover, N. H., December 31, 1937.

MAYORS OF THE CITY OF DOVER, N. H.

An act incorporating the City of Dover was signed June 29, 1855. It was accepted by the citizens of Dover at a town meeting held August 15, 1855. The first Mayor of Dover took oath of office March 25, 1856, and the City Government was then inaugurated.

ANNUAL REPORT
of the
CHIEF ENGINEER OF THE FIRE DEPARTMENT

DOVER, N. H., December 31, 1937.

TO HIS HONOR, THE MAYOR, AND GENTLEMEN OF THE
CITY COUNCILS:

I have the honor to submit the annual report of the Fire Department for the year 1937, as required by Chapter XIV, Section 5, of the Ordinances of the City of Dover.

FIRE APPARATUS

In service at present: One Ahrens-Fox ladder truck, one White combination truck, one International truck equipped with a four hundred gallon Barton pump and one hundred and fifty gallon water tank, one Ahrens-Fox 750-gallon pump, at the Broadway Station, all fully equipped, and one 1,000-gallon Ahrens-Fox pump, all equipped, at the Sawyer's Station, also one Reo truck equipped with hose and chemicals, at the Dover Point Station, also in reserve there is one horse-drawn pump and one wagon. All trucks and equipment are in very good condition.

HOSE SUPPLY

On hand at the present time there is 8200 feet of 2½-inch hose in very good condition, also 350 feet in poor condition, and 1050 feet of inch-booster hose in good condition. There is 5500 feet of 2½-inch hose, and 1000 feet of inch-booster hose loaded on five trucks at all times.

FIRE ALARM EQUIPMENT

There is a completely equipped fire alarm room at the Broadway Station, also a repeater box attached, with which any alarm box may be struck in the city, three indicators, three house tappers placed in the homes of the engineers, one striker attached to steam whistle of the I. B. Williams Factory, one striker at the Beckwith Box Toe Co., not in use at present, one striker attached to bell at the American Woolen Co. All fire alarm boxes and equipment are in very good condition.

RESERVOIRS AND INSPECTIONS

All reservoirs are found and maintained in proper order.

I have personally made seven hundred and thirty-four inspections in the city against fire hazards in the year 1937, and maintained fire drills for our schools, and a continued check of all institutions and factories, fire escapes, theaters, and all fire exits in the city.

PERSONNEL OF THE FIRE DEPARTMENT

Chief Engineer

TERRENCE W. O'NEILL

First Assistant Engineer

GEORGE J. O'NEIL

Net loss	\$ 4,807.32

IN CONCLUSION

In closing this report, I wish to publicly thank the engineers and members of the Fire Department, City Marshal McDaniel, and members of the Police Department, also Motor Vehicle Inspector Harold Foss, and members of the State Police for their cooperation at fires.

I also thank the merchants and property owners, who have so earnestly cooperated with me for the past three years in the discharge of my duties in reducing the fire hazards of our city.

Our citizens will note a small deficit in this report, and I wish to inform them that the attributable cause for same was unforeseen expense added to the department after the appropriation was allowed by the finance committee. These added expenses are, namely: Coal supply for stations, Insurance on trucks in case of accident, also eleven hundred feet of hose bought this year to keep our hose supply at a standard, as there was none bought in the year 1936, although there was a sufficient balance left of the 1936 appropriation to buy one thousand feet of hose.

The care and drying of hose is the main factor in the added life of our hose supply. The department has built up its hose supply by one thousand feet in the past three years.

Respectfully submitted,

TERRENCE W. O'NEILL,

Chief of Department.

ANNUAL REPORT
of the
EXECUTIVE OFFICER of the BOARD OF HEALTH

GENTLEMEN OF THE CITY COUNCILS:

I have the honor to submit herewith the report of the Health Department for the year ending December 31, 1937.

In reviewing the work of the year it is manifestly apparent that the duties of the executive officer have been enlarged along various lines, particularly in the enforcement of health laws under the Province of the Department of Public Health.

I wish to state that the standard of milk now being sold in our city has been improved by dealers anxious to comply with the provisions of the law and regular inspection by the Board of Health.

The work of collecting garbage is steadily increasing, and at the present time our collections total 20 tons a day.

It is the special province of the health officer to safe-guard the public health. With this thought in mind I have taken measures at all times to prevent the spreading of contagious diseases, so that our city has been during the past year free of any epidemic.

In this report I have given but a summary of the work accomplished during the year. Such as burial permit death certificates, licenses, which must be reported promptly to the State Official, I have not mentioned because I don't wish to bore you with too many details concerning them.

However, I wish to thank those who rendered service to the department during the year and to the Finance Committee and members of the out-going City Government and His Honor, the Mayor, for the kind support that was given to me in the management of my department.

Sealer.

ANNUAL REPORT
of the
CITY SOLICITOR

TO HIS HONOR, THE MAYOR, AND GENTLEMEN OF THE
CITY COUNCILS:

In accordance with the requirement of the City Ordinances, I hereby submit the following report.

During the past year there has been brought against the City of Dover the following actions that are now pending in the courts.

In Rockingham County where the plaintiffs reside

Myra D. Littlefield	vs	City of Dover
Elma J. F. Littlefield	vs	City of Dover
Elizabeth M. Furber	vs	City of Dover

The above actions are brought for personal injuries and personal property damage suffered when the automobile of Myra D. Littlefield standing on Central Avenue was hit by the Fire Truck of the City of Dover March 19th, 1937.

In Strafford County are the following cases now pending

Susie I. White	vs	City of Dover
----------------	----	---------------

This action is based on a claim of damages to the property of the plaintiff caused by the City in change of flow of surface water from Towle's Field.

Dana Eldridge	vs	City of Dover
---------------	----	---------------

This action is based on a claim for personal injury to the plaintiff through alleged want of repair to Eliot Bridge.

At the September Term of the Superior Court for Strafford County the City recovered judgment against the County of Strafford in the amount of \$648.02 for money paid in aid of poor people.

This above amount was paid after judgment by the County into the City Treasurer's Office.

All matters called to my attention by the Police Department have been attended to.

Respectfully submitted,

ALBERT P. SHERRY,

Solicitor.

Dover, N. H., April 21st, 1938.

ANNUAL REPORT
of the
BOARD OF POLICE COMMISSIONERS

TO HIS HONOR, THE MAYOR, AND GENTLEMEN OF THE
CITY COUNCILS:

Again at the close of another year we are favored with the honored pleasure in submitting our annual report for the year ending December 31, 1937, of all business transacted by the Dover Police Department, and schedule of all fines received from the Municipal Court and converted into the City Treasury funds.

Police Commissioner and clerk of the board, Thomas W. Webb, term of office expired September 1, 1937, continued hold over until regular meeting of His Excellency, Governor Francis P. Murphy, and his council. At this meeting, December 15, 1937, he was officially appointed to succeed himself and confirmed for a three year term of office, thus leaving the police commission on this particular date the same as previously organized: Owen Coogan, chairman; Thomas W. Webb, clerk; Robert W. Greenaway.

PERSONNEL FOR THE DEPARTMENT FOR THE YEAR, 1937.

ANDREW H. MCDANIEL, City Marshal

JOHN J. MURPHY, Assistant Marshal

WILLIAM D. LOTHROP, Sergeant

PATROLMEN

Harry McCarthy

Frank W. Jones

George A. LaBonte

Dewey W. Allen

Edward F. McDonough

Henry E. Griffin

Perley A. Quimby John J. Daley
 George E. Fleming
 Reserve Officer -- Alphonso M. Ayer

SPECIALS

John A. Smith Stephen J. Lyons
 Patrick J. Fagan

Shortly after confirmation of Police Commissioner Thomas W. Webb, the Grim Reaper claimed our honored and esteemed chairman of the commission, Owen Coogan. After a lingering illness of several months, he passed away December 22, 1937, and in his passing we mourn his loss, and extend to those bereaved our deepest sympathy and condolence for a true and trusted friend and citizen. This vacancy at the present time unfilled, and space reserved in his memoriam.

IN MEMORIAM

OWEN COOGAN

Appointed Police Commissioner

February 25, 1925.

Elected Chairman Police Commission

February 5, 1934.

Died December 22, 1937.

Age 66 years.

We are much pleased with the financial standing of the department which we feel has been handled very successfully and efficiently by our City Marshal, Andrew

H. McDaniel, under our supervision ; detailed account of all expenditures and balance over allotted appropriation turned back into City Treasury.

FINANCES

Municipal Court fines	\$ 1,719.42
Dance licenses issued	63.00
Junk licenses issued	80.00
Fines paid into State Motor Vehicle Department	2,461.26
Lost and stolen property recovered and returned to owners	9,625.49
<hr/>	
Appropriation	\$ 27,000.00
Earnings Municipal Court	1,719.42
Buick condemned and junked	10.00
<hr/>	
	\$ 28,729.42
Disbursements	28,693.29
<hr/>	
Balance	\$ 36.13

Our commendation we extend to our City Marshal, Andrew H. McDaniel, and all other officers of the department for their efficient and zealous cooperation in maintaining devoted interest in their duties as servants to the general public for the protection of lives and property.

Respectfully submitted,

OWEN COOGAN,*

THOMAS W. WEBB,

ROBERT W. GREENAWAY,

Police Commissioners.

Police Headquarters, Dover, N. H., December 31, 1937.

Operating automobile unreasonable speed to en- danger	3
Runaway boys from home	4
Rape	1
Robbery from U. S. Mail	1
Speeding	11
Selling patent drug unlawfully, not registered pharmacist	1
Selling liquor without permit	4
Selling adulterated meats containing Sulphur Dioxide	2
Stubborn child	3
Suspicion	10
Safekeeping	123
Violating prison parole	1
Violating Industrial School parole	2
Witness	1
	<hr/>
	590

They were disposed of as follows:

Appealed	4
Bound over Superior Court	16

Continued for sentence	32
Committed to House of Correction	92
Committed to County Jail	10
Committed to State Hospital	2
Committed to Industrial School	6
Dismissed by order of county solicitor	1
Delivered to out of town police	17
Delivered to parents	3
Delivered to sheriff	3
Delivered to motor vehicle inspector	4
Delivered to U. S. Marshal	1
Delivered to U. S. Immigration Inspector	1
Delivered to N. H. State Police	2
Delivered to U. S. Naval Prison, Portsmouth, N. H.	1
Delivered to superintendent Industrial Sschool ..	3
Delivered to State School, Laconia, N. H.	2
Delivered to State Hospital	1
Discharged without trial	216
Discharged after trial	5
Nol-prossed	12
Paid fine and cost	92
Placed on file	3
Paid cost	3
Suspended mittimus call of court	58
	<hr/>
	590

FINANCES

Appropriation	\$ 27,000.00
Municipal Court fines	1,719.42
Buick car condemned junked	10.00
	<hr/>
	\$ 28,729.42
Disbursements	28,693.29
	<hr/>
Balance	\$ 36.13

Dance licenses issued during the year	\$ 63.00
Junk licenses issued during the year	80.00
Municipal Court fines of automobile violations paid into State Motor Vehicle Department	\$ 2,461.26

Number of arrests made during the year . .	590
Lodgers cared for at police headquarters for the night	966

Property damage	196
Injured in automobile accidents 85, with 2 fatalities.	

At this season of the passing year it becomes very essential that a full and detailed report be made. I therefore consider it a most befitting time to express my sincere appreciation as a tribute to the Honorable Board of Police Commissioners for their thorough understanding of cooperation. Also, thanking Honorable Patrick W. Murphy, Judge of Municipal Court, and city solicitor, Albert P. Sherry, both of whom have proven very helpful to the department with advice, Clerk of Court, Bert Wentworth, Deputy Chief of New Hampshire State Police, Ralph W. Caswell, and corps of assistants, together with County Solicitor, Thomas

J. McGreal, Sheriff, Stephen W. Scruton, Scout Master, Edward Young, and all members of the Boy Scouts, who have proven themselves of valuable assistance to the department during the summer months, and at other times when called upon for services.

To all officers of the department, I feel very grateful to them for responding so willingly to any emergency that may arise even ever so hazardous in it's undertaking. All such duties are very commendable and deserving of such credit by me.

Respectfully submitted,

ANDREW H. McDANIEL,

City Marshal.

DOVER, N. H., December 31, 1937.

ANNUAL REPORT

of the

Paid City Treasurer	1,719.43
Paid witness fees, printing, spe- cial Justice, stationery	1,067.33
	<hr/>
	\$ 5,248.01

Seventy-five cases have been entered in the Civil Docket.

Respectfully submitted,

BERT WENTWORTH,
Clerk Municipal Court.

DOVER WATER WORKS

REPORT OF WATER COMMISSIONERS

TO THE CITY COUNCILS OF THE CITY OF DOVER:

GENTLEMEN:—Agreeably to a provision contained in Section 6, Chapter 29, of the City Charter, the Water Commissioners of the City of Dover have the honor to submit herewith the fiftieth annual report for the year ending December 31, 1937. For the complete details of the Water Department, you are respectfully referred to the report of the Superintendent, which will appear in the City Report.

The organization of the board for the year was as follows: President, Hon. James P. Keenan; Vice-President, Philip C. Brown; Secretary, Mark J. Pilgrim; John D. Grady; Cesaire Houde.

We submit herewith a brief outline of the more important matters of the year's work:—

Pumping Station:—The pumping station has been finally completed. The new Morris Pump is in operation and continues to keep up the high standard of duty required. A new hard-wood floor has been laid and polished, adding to the beauty of the station. The general condition of the pumping plant is excellent and is now open to the inspection of the general public.

Receiving Basin and Reservoir:—During the past year the receiving basin and reservoir have been cleaned and were found to be in fine condition, with no repairs

necessary. A new steel-wire fence has been built around the reservoir, replacing the old wooden one, thereby preventing pollution of the city's water supply by mischeivous individuals.

Character of the Water:—The quality of the water has been good and this fact is attested by the condition of the health in our city. Our sources of supply, the Layne Well, Hussey Springs and Willand Pond, are such that the citizens of Dover have an adequate supply for not only the present but for future development.

Extensions and Improvements:—A new twelve-inch water main has been laid from Florence Street to Oak Street to the Reservoir. This will provide fire protection to the Kidder Press Company and all citizens in that vicinity and give to the entire city an additional pressure and service, providing as it does another outlet to the Reservoir. A new eight-inch water main has been laid from Broadway to Portland Avenue, along St. John Street and a new six-inch main, connected with said eight-inch line, laid on Durrell Street and Winter Street, giving to the residents of this locality additional fire protection and pressure.

Filter Beds:—Realizing the need of pure water, the filter beds have been emptied and refilled for the first time in thirty years. The old sand has been replaced by filter sand from Plum Island, Newbury, Mass., as recommended by the State Board of Health. The filters are now in operation, guaranteeing pure water to the citizens of Dover.

As to the financial standing of the department, we wish to report a successful year. Final payment on the Well Bonds, issued in 1931 was made, and a payment of \$5,000.00 was made on the Extension Bonds of 1934. Total cash receipts for the year amount to \$87,023.82,

the same having been paid to the City Treasurer. Uncollected accounts, December 31, 1937, amount to \$6,881.18, one of the lowest amounts on record. The cash balance of the department, December 31, 1937, is \$1,836.19.

Respectfully submitted,

JAMES P. KEENAN,

PHILIP C. BROWN,

JOHN D. GRADY,

CESAIRE HOUDE,

MARK J. PILGRIM,

Board of Water Commissioners.

Dover, N. H., December 31, 1937.

DOVER WATER WORKS

REPORT OF THE SUPERINTENDENT

TO THE BOARD OF WATER COMMISSIONERS, Dover, N. H.:

GENTLEMEN:—I have the pleasure to present the fiftieth annual report of the Superintendent, showing the present condition of the department, the extensions and improvements made, together with a statement in detail of the financial condition of the department for the year ending December 31, 1937.

The extensions of the mains for the year were as follows:

Broadway, Oak Street and Garrison Hill -- 2,415 feet of 12-inch pipe.

Oak Street Extension -- 284 feet of 6-inch pipe.

St. John Street -- 566 feet of 8-inch pipe.

Winter Street -- 270 feet of 6-inch pipe.

Samples of water have been tested by the Chemistry Department of the State Board of Health each month during the year and were found to be of excellent quality.

The following table and figures show the activities of the department in detail:

Services renewed 136

Services added	39
Services discontinued	2
Repaired inside street line	32
Services repaired outside street line	36
Shut off for owners to make repairs	5
Services frozen	1
Number of services to date	2,558
Shut off and turned on	151
Meters repaired	300
Meters repaired by department	216
Meters repaired by factory	84
Meters tested	78
Meters replaced with new	22
Meters frozen	7
New meters set	58
In use to date	2,491
Hydrants added to system	2
Total hydrants in use at date	302
Hydrants repaired	5
Gates set in hydrant branches	2
Distribution system leaks	4
New gates set	8
Total gates now in use	361
Gates repaired	1

Extension of mains during year	3,535 (feet)
Total mains now in use	41.42 miles
Extension of services during year	1,677 (feet)
Total services now in use	24.16 miles

 Auditors.

ANNUAL REPORT
of the
SUPERINTENDENT OF SCHOOLS

TO THE HONORABLE, THE SCHOOL COMMITTEE OF
DOVER, NEW HAMPSHIRE.

I take pleasure in submitting my fourth annual report, it being the sixty-sixth in the series.

“The aim of education is to enable a person to continue his education,” so quotes our eminent educator and philosopher, John Dewey. We, as educators, realize that education does not stop at any one point in the school system whether it be primary, elementary, secondary, or post-secondary; it continues throughout life.

A public school system of 12 to 14 years cannot endeavor to make a finished product of any one individual. Each one has peculiar characteristics which identify him as an individual and education strives to build a foundation on those potent traits which will prepare youth for the sterner realities of mature life.

History develops itself today; and may be taught tomorrow. Prognostications and premonitions cannot be taught as facts. Only those facts which have stood the test of time and investigation as actualities are available to educators.

Education then, is a process of inculcating into the minds of humans, truths and facts no matter how simple or intricate. The very fundamentals taught to our ancestors are still retained in a basic way, with changes only in the methods of presentation. The learning

process by the individual of today is basically the same as it has been, and will continue as long as humans. Man cannot change the actual process of learning within a person, but as an educator can only assist by presenting subjects in such a way as to arouse the interest of the student.

A person may have a latent ability for a particular aptitude which would be very slow to materialize if left to the individual for chance development, but with assistance from an instructor skillfully presenting the subject, such an aptitude is brought to the forefront in a much shorter space of time.

Educators realize that some persons are contextually minded, some mathematically minded, and others manually minded. In referring back to schools of former days, we can readily see that they were organized and taught for the contextually minded. "The Little Red School House produced famous men and women," so it is said. The majority had no more than an education obtained from these schools. Why? Few schools were offered them to attend, and subjects beyond the 'Three Rs' that the extremely bright could master were opened to a selected few. This naturally ruled out the uninterested and incompetent, who found employment on farms and elsewhere, while the selected few continued their education by themselves or at some college where specialization subjects were offered leading to professions of those times.

Today we find a system that is as complex and broad as the former was limited and narrow. Many times educators are asked, "What is best for my child to follow in school or college?" Unless the desire of the pupil is definitely known, then and only then, are we able to advise wisely the general direction in which the student should advance. Many students do not know their own probabilities, being too young or immature

mentally to conceive the meaning of a life's work. The ambition today, to follow the course of a technical engineer, may be supplanted tomorrow, by the desire to become a physician. It is a hazardous undertaking for educators in public schools to offer a definite plan for a student to follow in after public school life.

Through the use of diagnostic, achievement, and aptitude tests, a fairly good prognostication of the student's ability to follow contextual or manual subjects is obtained in some perplexing problems.

Consequently, the higher grades in our system must offer, not only the so-called cultural subjects, but also the practical arts where we find our largest enrollment.

We can only hope to present truths in such a way as to interest the individual, that he or she may elect further information along those subjects in which their interest seems to have focused.

The deepest question in American life today is not economic or political, it is educational. It is the thinking power of a democracy. Can our people understand and direct their own thinking, or must someone else do their thinking and make their decisions for them. As educators, in education institutions, we are pledged to direct individuals into consideration of the real problems of society and purposes of life.

SCHOOL BUILDINGS

Two years ago, we looked forward to an increased sitting enrollment in the High School. This foresight was justified by dividing a large room into two small ones. The use of one room last year as a class room, and the use of the other one, this year, as an auxiliary home room available before regular recitation periods began, eliminated any great concern for the present year.

Should high school enrollments continue to increase, as it is probable, we must look forward to a building program that would extend from kindergarten through the high school.

You have read in my previous reports, recommendations for the erection of a central building to relieve congestion throughout the city. This year an overcrowded condition exists in the first grade at the Hale School, where the only solution is to accommodate one half the class during the morning session, and the remainder, for the afternoon. This is very unsatisfactory from a pedagogical point of view, but under existing conditions there is no alternate. Furthermore, the first grade at the Varney School has an enrollment of 41 pupils. Such a tremendous overload in our first grades, where the foundations for the successive years are laid, is bound to provide a handicap that will be felt in the future.

SCHOOL REPAIRS

No major repairs have been undertaken by the City Council's Committee on School House Repairs during the year, yet many needed minor repairs have greatly improved some situations.

ENROLLMENTS

Increasing number of enrollees in the High School seem to be a permanent factor that must be contended with every year. The present school year has been no exception to the fact, and in all probability will continue. Lack of employment for the adolescent with a desire for an education makes the senior high school an opportune solution.

The following table, a comparison of the enrollments in the high school covering a four-year period, is interesting and informative:

<i>High School</i>	'34-'35	'35-'36	'36-'37	'37-'38
Freshmen	230	270	254	263
Sophomores	182	190	228	210
Juniors	123	130	150	191
Seniors	124	130	150	161
Post-Graduates & Specials	18	12	14	13
Totals	680	764	827	847

The table of enrollments in the elementary school shows a slight decrease, due no doubt to the decrease in the birth rate, which is not only a local but a national factor.

<i>Elem't'y Schools</i>	'34-'35	'35-'36	'36-'37	'37-'38
Grade 1	153	133	154	178
Grade 2	137	144	125	127
Grade 3	138	147	139	123
Grade 4	150	131	134	147
Grade 5	158	168	139	148
Grade 6	174	161	166	146
Grade 7	179	162	157	162
Grade 8	170	192	168	152
Totals	1259	1238	1192	1183

TEACHERS

The services of the following were lost by death, during the year:—Mr. Thomas L. King and Miss Grace B. Henderson.

The following were elected to take their places, respectively:—Mr. Everett Drake and Miss Katherine Farrell.

Matrimony claimed the resignation of Miss Irene Couser and Miss Mary Daley. The following were elected to fill their places respectively:—Miss Doris

Fowler and Miss Ida Bascom, the latter being transferred from the Back River School to the Sherman School, with Miss Lona Mathes being elected to fill the Back River School position.

EVENING SCHOOL

Previous to this fall, the expenses of evening schools, as established in this City, were borne by the school department out of department funds. Cooperating with the State Board of Education, Dover was able this year to secure the services of a teacher whose salary will be paid as a worker on a W. P. A. project. The results of such a person in charge of this project have been most gratifying, as more individuals have shown their interest in this school of Americanization than in the past.

EDUCATION ACHIEVEMENTS

Our schools continue to retain a high degree of efficiency. This statement is substantiated by the achievements and records of our high school graduates who are in colleges, normal schools, and universities at the present time.

The High School continues to follow the suggested requirements set forth by the State Board of Education, and is classified as a Class A. approved secondary school.

Non-credit courses in Art and Art Appreciation, and Automobile Driving and Road Rules have proven to be interesting and of value to pupils electing such courses.

SCHOOL TRANSPORTATION

I would call your attention to the modern equipment used in the transportation of school pupils. The buses, seven in number and the sedans, two in number, present a system comparable to none in the State. The

service, as rendered, is highly commendable, and the interest of the owner, in his endeavor to accommodate the patrons, is praiseworthy.

RECOMMENDATIONS

Reiterating some of the recommendations as set forth in previous reports: The need of kindergartens and opportunity rooms is as urgent and necessary as ever. Such rooms can only be obtained through a building program which should be set in motion during the ensuing year.

Physical education as an adjunct to the secondary school program is highly recommended for consideration.

A full time instructor in chorus and instrumental music for the upper elementary and secondary schools should be given consideration.

I recommend the purchase of a portable sound and picture machine.

CONCLUSION

The following reports are commended to your attention for they display the objectives and results of the departments: High School Headmaster, School Nurse, Director of Physical Education, Music Supervisor, Art Supervisor, and Practical Arts -- Mechanic and Domestic.

In conclusion, my appreciation of the cooperation I have received from the School Committee, teachers, and parents is hereby expressed.

Respectively submitted,

CHESTER L. HOWE,
Superintendent of Schools.

December 31, 1937.

ANNUAL REPORT

of the

HEADMASTER OF THE DOVER HIGH SCHOOL

TO THE SCHOOL COMMITTEE:

I submit herewith my annual report as Headmaster of Dover High School.

Last September on the opening day of school the high school registered 817 pupils. This exceeds by about fifty the largest number of high school pupils ever assembled in the building at one time. Following the opening day the registration has gradually climbed upward until today there are 848 pupils registered. This is again a record enrollment and exactly twice that of ten years ago. For the school year of 1927-28 there were 424 pupils registered. Under this increased enrollment the capacity and facilities of the building are taxed to the limit.

The following shows the change in enrollment for the last few years:

Year	1931-32	1932-33	1933-34	1934-35	1935-36	1936-37	1937-38
Enrollment	575	585	620	695	776	833	848

The present registration is divided as follows:

	Boys	Girls	Total
Post-Graduates	4	4	8
Special	3	3	6
Senior	78	83	161
Junior	107	84	191
Sophomore	137	82	219
Freshman	146	117	263
Total	<u>475</u>	<u>373</u>	<u>848</u>

The percentage of city grammar school graduates entering high school last September was five percent higher than a year ago. The following shows the percent of admissions for the last eight years:

	1930	1931	1932	1933	1934	1935	1936	1937
Hanson A	80.0	92.3	91.2	92	97	95	91	87
Hanson B	66.6	90.6	85.0	85	90	93	93	84
Hanson C	47.1	72.7	72.0	82	72	86	79	
Sawyer	82.5	94.5	90.0	84	90	88	83	90
Sherman						94	68	88
Average	—	—	—	—	—	—	—	—
Percent	69	87.5	76.1	87	90	92	82	87

For the last three years the entering class has been about the same in number. This year with a registration of two hundred and sixty-three it is one less than a year ago. In this group there are one hundred and twenty-two from the city grammar schools, eight from the rural schools, thirty-two from St. Mary's, twenty-three from St. Charles and seventy-eight from schools outside the city limits.

Between the opening of school and December first twenty-eight pupils left school. This represents a loss of three and three-tenths percent, the lowest in several years. The table below shows a comparison of the percentage of pupils leaving during the fall term for the last eight years.

PERCENTAGE LEAVING SCHOOL DURING THE FALL TERM

Year	1930-31	1931-32	1932-33	1933-34	1934-35	1935-36	1936-37	1937-38
P. C.	7.4	5.3	8.6	4.7	3.8	3.4	5.2	3.3

It may be seen from the following table that the loss, as usual, is the greatest in the freshmen and post-graduate groups.

PUPILS LEAVING DURING FALL TERM

	Boys	Girls	Total
Special	1	0	1
Post-Graduate	3	1	4
Senior	2	1	3
Junior	1	1	2
Sophomore	1	2	3
Freshmen	7	8	15
	<hr/>	<hr/>	<hr/>
Total	15	13	28

The reasons for leaving are recorded as follows :

Six secured employment, eleven moved away and entered school elsewhere, six lost interest, two were outclassed, and a change in home conditions caused three to leave.

The program of studies approved for the school this year is practically the same as that of last year. The only change is a slight one in terminology. The subject formerly called Household Chemistry was changed to Applied Chemistry.

At present the program contains four courses: Academic, Commercial, Home Economics and Industrial.

The college preparatory pupils find most of their work in the academic course. Eighty-eight to ninety percent of all pupils entering the freshman class do not enter college but go out to become citizens in our community. They take the majority of their work in the commercial, home economics and industrial courses. These departments are all doing excellent work and are fully reported upon by the teachers in charge.

It is felt that the program could be further strengthened if a course in vocational agriculture was added. Such a course would provide for boys, coming from farms, a much better program than anything the

school can offer at present. There are sixteen high schools in the state offering such courses successfully. While the addition of this course to our program would necessitate a teacher who has specialized in the work, the salary cost would be less than the average for Dover as one-half of the salary can be paid from federal funds.

A survey of our pupils last year showed that there were in school seventy-seven boys who lived on farms. A similar check this year shows seventy-nine boys living on farms. It is not expected that all of those pupils would be interested in agricultural subjects but there would be a sufficient number to form adequate sized classes. Pupils in this course would take three-fourths of their work in subjects now offered in the school while one-fourth would be in the new agricultural subjects to be offered.

Thirty-eight of our June 1937 graduates entered in September post-secondary institutions as follows: University of New Hampshire, 27; Nasson Institute, 3; St. Anselms, 2; Keene, 2; Cornell, 1; Tufts, 1; University of Wisconsin, 1; and Edgewood Park Junior College, 1.

In addition to the above, eleven graduates entered special trade schools and nine others applied to hospital training schools. This leaves as usual a majority who secure employment or remain at home.

Any school is organized primarily for class room work but there are a great many other activities sponsored and supported by a school which contributes very definite educational values to school life. Many of these offer excellent opportunities for developing self-confidence and qualities of leadership. While the local program is not as elaborate as can be found in many schools the high school is this year sponsoring and supporting

the activities mentioned below. Those best known are in the field of athletics where teams are active in football, basketball, hockey, baseball and track. Teams enjoying successful seasons are maintained for boys in all of the above and for girls in basketball and baseball. In connection with these activities the need for an athletic field is keenly felt. Dover needs and should have a more suitable place not too far from the school for its home games. This must be obvious to anyone who (this fall) attended the Dover-Somersworth football game. The orchestra and band continue to do excellent work making several public appearances during the year. Clubs which meet regularly for social and educational programs are as follows: Literary, Dramatic, French, Latin, Hi-Y, Home Economics, and Radio. There is also a chapter of the National Honor Society. The educational and social life of the school is further enriched by a school paper, class socials, and school dances. While the activities are many it must be remembered that few pupils participate in more than two or three and that there are many who do not take part in any activity.

All of the above activities are being administered this year under the newly formed Student Activity Association. Last spring the Headmaster and Submaster asked the school board to accept and make a part of their regulations a constitution for the control of pupil activities. This was done believing that such an organization would bring about greater pupil interest in all school activities, greater pupil participation in activities, better financial support, and eventually better school morale.

While it is much too soon to tell how satisfactory the plan will be over a period of time certain things are obvious. More pupils have entered into the plan than was anticipated and there has been a marked increase

in the attendance of pupils at school activities, especially those supported only lightly by pupils in the past.

To date approximately ninety percent of all those pupils who started on the plan have continued. The number dropping out is much less than was expected. Further study of the plan in operation will be necessary to determine weaknesses and desirable adjustments.

In the operation of the school there is another matter which needs attention and adjustment. As pointed out in this report the enrollment in the high has doubled in the last ten years. This is not so in the case of the teachers who are required to handle the work. While the enrollment has increased one hundred percent the teaching force has increased less than fifty-six percent. In other words, according to 1927-28 standards, the high school is about eight teachers short this year. Add to the extra class room load the supervision of the various activities, very few of which were a part of the school program ten years ago, and one can readily see that the teachers are too heavily loaded. These increased loads will gradually lower the standards that should be maintained, affecting most seriously those pupils in the college preparatory groups. These pupils should be placed in classes by themselves and required to do a grade of work superior to that demanded of the non-college preparatory groups. With the present teacher loads it is impossible to do this. It is true that the published opinions of many leading educators today are that the success of the modern cosmopolitan high school cannot be measured by the performance of its graduates in college. Here in Dover this group constitutes only ten or twelve percent of the pupils entering high school but adequate provisions should be made for their needs.

We should recognize the fact that the high school of today is unlike, in certain ways, the school of yester-

day. With little change in population and an enrollment which has doubled in ten years it can only mean that large numbers of our youths who formerly went to work at the end of the compulsory school age are now attending high school. This fact adds many problems to the operation of the school. Much is lacking in the way of suitable text, reference material, teaching devices and aids for certain groups. It is felt however that under existing conditions teachers are doing creditable work. We also feel that on the whole our pupils are contented and happy in their school life.

I wish to express my appreciation to the school committee, superintendent, and teachers for their cooperation and support.

Respectfully submitted,

CLIFTON H. DUSTIN,
Headmaster.

December 31, 1937.

MUSIC REPORT

Dover, N. H.,

December 14, 1937.

Mr. Chester L. Howe,
Superintendent of Dover Public Schools,
Dover, N. H.

My dear Mr. Howe:

I herewith respectfully submit my report of the Music Department, Anno Domini 1937.

With great appreciation of your kindness and understanding of the operation of the music department, I am

Very truly yours,

ELMER WILSON.

The aim of the music report is to inform, through the school committee and Superintendent, those who have not the time to visit school and observe the work in operation.

I wish to thank the Superintendent and school committee for their help, approval and continuance of the high standard that has been set by the music students.

New Hampshire requires strict qualifications of their music supervisors and teachers.

The teaching of music in the public schools is an important and sacred trust, particularly in our program from the seventh and eighth grades through the more mature high school years.

The seventh grades meet in a large group at the High School. These voices are carefully tested and classified. Special attention is given to the cultivation of beautiful tone. Previous sight reading knowledge is reviewed and reinforced. Songs are sung in two, three and unison parts to develop part singing. Attention is given to outstanding vocal talent.

The eighth grades also meet at the High School in a large group. The voices are tested for classification peculiar to the adolescent Junior High period, Soprano, Second Soprano, Alto, Alto-Tenor, Baritone and Bass quality. Previous sight reading knowledge improved toward three and four part singing. Vocal quality improved through vocal exercises for tone alone. Solo voices are noted in various timbres and help is given as time permits.

The seventh and eighth grades gave an impressive performance of "Pinafore"--Gilbert and Sullivan--last Spring. This required many extra rehearsals. The seventh and eighth grade teachers were untiring and unselfish in their preparation of this work, and worthy of great commendation. An occasion of this kind is a fine thing for children who are growing up in a community.

THE HIGH SCHOOL

The High School work consists of Glee Club, Orchestra and Band, plus the general weekly assemblies.

The orchestra is a large group with varying abilities, but with the more talented players make a very fine ensemble.

The development of the younger players insures the perpetuation of the orchestra.

The orchestra studies musical literature of the best type. Attention is given to bowing, phrasing, tone and tonal balance. Sectional and individual work is heard.

All procedures are up to date and characteristic of modern pedagogy.

Players from Dover High Orchestra will again be represented in the New Hampshire High School State Symphony Orchestra at the tenth anniversary Music Festival.

The orchestra plays at all assemblies and cooperates with school and civic functions.

The Glee Club is elective and is composed of a large group who really want to sing and work to accomplish something in vocal music.

This group sang at the Christmas assembly, 1936, and appeared at The Kiwanis Music Festival last Spring. They are now working on the Dover Spring Music Festival Music.

The Senior Class comes in later in the year to prepare their graduation music. The graduation classes have always performed their vocal numbers in a very satisfactory manner.

Assembly Singing. The entire student body enters the Assembly Hall several times a year for a general sing. These "sings" are not of the usual "yelling events" of some schools, but a demonstration vocally of a dignified "thought out" program. The public would be pleased and impressed should they attend one of these assemblies.

The Band. The band rehearses a double period each week, after school. As we have no Junior band we are constantly on the lookout for young players for the purpose of developing them to take the places of players who graduate.

The Dover Band played two solo ensemble numbers at Nashua last Spring. They were of the type which is the Supreme test of a band. Several educators from

Dover and elsewhere were warm in their comments of this performance.

The Band is trained with care and play correct band building music of the calibre used and approved by leading band educators.

In general, High School bands have been looked upon almost entirely as a general utility medium of public school music. It is usually used for pep meetings, entertainments, community affairs and indispensable for the athletic football games, et cetera, a sort of a hit and miss organization with no other objective than to create enthusiasm.

The Band gladly and willingly contributes to these activities but does not function with the above as objectives.

The phase of band work that we stress is the treatment of the band as a dignified organization, capable of lofty musical ideas with tone quality and attaining the same ends as the chorus or orchestra.

There is no need at this time or in this age to present any argument to justify the place of the Bands in high school system. Our program is a double period out of school time which should carry one fourth credit. We have also extra rehearsals during the year which, if added up, would show more than the program requires.

The aims and objectives of the Bands which have made for success are listed below:

A. *Aims.*

1. Good tone quality
2. Perfect intonation
3. Good rhythm
4. Accuracy of reading
5. Expressive performance

B. *Objectives.*

1. Social objectives.

- a. Knowledge of events, persons, customs that have prompted and determined our music literature. Music that reflects the character and spirit of times.
- b. Knowledge which functions directly in the development of disposition and discovery of abilities. Present day class instruction has brought to attention many cases of unusual musical ability.
- c. Knowledge useful in the control of life situation --
 - a. Friendships from group participation. Development of good citizenship, unselfish giving of extra time to civic occasions when called upon for instrumental needs.
 - b. Development of a sense of responsibility.
 - c. Correlation with art, political and literary history.

2. Vocational objectives.

- a. Acquiring fruitful knowledge. Skill acquired upon instruments constitutes valuable vocational training.
- b. Emotional Outlet.
- c. Develops taste and appreciation of the fine things in life.
- d. Provides means of self entertainment.
- e. Is a fine mental stimulus.
Reading at sight develops alertness, accuracy and precision.
- f. Develops confidence and self control.

- g. Creates a desire for further knowledge and appreciation of music.

C. *Organization.*

1. The school maintains one band.
 - a. Working on a training band.
 2. Each student encouraged to study privately. Those who cannot afford private lessons (and having music talent) class lessons should be provided, plus an instrument.
 3. The bands rehearse a double period each week, plus extra rehearsals for any special occasion of public appearance.
-

In closing I wish to call attention to last Spring's Kiwanis Musical Festival. Our school music forces from the seventh grade through the High School grades were represented in vocal and instrumental performance. The program and standard musically set by our youth at that concert now on record can be perpetuated by continued guidance and understanding of the human values in school music education.

REPORT OF MUSIC SUPERVISOR

Why a Report?

Time was, when there seemed to be something new to be said, when something new had been done, and when there were still needs to be noted and recommendations to be suggested.

After fifteen years, and fifteen reports have been lived through we fear the newness has worn off, and the interest may be waning. Is there anything to tell that is not known, or anything to ask that would not be given if feasible?

We sometimes wonder if we are using the equipment we have, and the talents of teachers and children to the limit. Are we, teachers and children, learning to live? We grow more anxious every day, and there is certainly some reason for our worry, that the child shall learn to earn his own living. The dollar is more than ever the standard of success, not the value to the world of the child's life, nor the development of the child's nature.

Music and Art must work in quiet, unobtrusive ways, for the most part, but they continue to work to give the child a chance to feel and express beauty. I think Art has the advantage of Music in being of necessity individual in expression, and permanent in form. Music must be studied in our schools and expressed in company with others in class work. Still there is an advantage in this, too, for playing in ensemble, and part singing in chorus, are especially enjoyable to real musicians, as well as to the children, the beginners. But in these days the individual child cannot be trained to

read music en masse. He must be heard as an individual. Copying and trailing are the bane of the teachers, and the ruin of the child's development.

So there is still work to be done, having children hear and express the beautiful music which it at hand. Modern text books are marvels of skill and beauty, reproducing the lovely old Folk Songs, the classics, and the best modern music, and are even illustrated with reproductions of the finest pictures.

We need to have more of these books and to learn how to use them to greater advantage, and so to secure the enthusiastic interest and hold the attention of the children.

We appreciate the co-operation of parents and hope for still greater interest on the part of all the citizens.

May there be more organizations like the Schools of Music and our Choral Society.

Respectfully submitted,

MINNIE L. EATON.

REPORT OF THE DIRECTOR OF PHYSICAL EDUCATION

TO THE BOARD OF EDUCATION:

The work of the Director of Physical Education for the past year has followed, for the main part, the schedule of previous years, dealing with: first, a program of Physical Education in the Primary and Grammar schools; and secondly, coaching and supervising the High School athletics.

In the Primary Schools, the Director visits each grade once a week, spending 15 to 20 minutes in each room. Activities in these grades consist of games, stunts, story plays, marching tactics, simple calisthenics, and relays suitable for children of these ages.

The Grammar School schedule has one gymnasium period a week of 45 minutes for each grade. Boys and girls are separated in these classes and the program is suited to the age-levels. Various activities taught include: Calisthenics, marching tactics, group games, relays, and athletics of all kinds. In all these classes, the aim is to achieve a good all-around development with good sportsmanship and correct social attitudes being emphasized. The Director has 16 Primary and 13 Grammar School classes a week in this schedule.

The other half of the Director's duties includes coaching High School sports and supervising a program of intramural athletics. During the past year this work has been the coaching of football, basketball and track.

A program of intramural sports, particularly basketball, was again organized for those boys and girls in

high school and the upper grades of Grammar School who are not competing on varsity teams. These games are instrumental in developing material for future high school teams as well as furnishing wholesome recreation and exercise for the many youngsters who have not the ability nor the experience to make the varsity teams. This program, during the winter, included approximately 200 children who played on 30 different basketball teams and who participated in over 150 games last year at the high school gym.

Our varsity teams, during the past year, have hung up some very creditable records. The girls' basketball team, in particular, were Southeastern New Hampshire champions and were awarded jackets by the Athletic Council in recognition of their prowess on the court. Miss Williams, in her first year as girls' coach, turned out an exceptional team. The girls' baseball team also coached by Miss Williams, enjoyed a good season, winning 3 out of 4 games.

The boys' basketball team came strong at the finish, getting to the semi-finals of the University of New Hampshire State Tournament where Dover was eliminated in a close game by Berlin, ultimate champions. The record was 11 wins and 8 losses. One of our boys, Robert Boyd, won the outstanding distinction of being chosen Captain of the "All-State" team.

The hockey team, coached by Mr. Walker, was handicapped by lack of ice to practice and the loss of almost every veteran. The team made a creditable showing, however, reaching its peak in a victory over the strong Exeter Academy team.

The baseball team, also coached by Mr. Walker, finished in third place in the Southeastern League, winning 5 games out of 10.

The track team, with no place to practice and travelling three days a week to Durham for their train-

ing facilities, enjoyed a good season with three of our boys, Clayton Follansbee, Everett Crockett, and Sidney Peterman, winning State championship honors in their respective events.

The football team this year hung up the best record made by a Dover team in over a decade, losing only one game out of eight; that, a 7-6 verdict to Somersworth. Warren Peterman, star end, was picked on the "All-State" team. He is the second Dover boy to ever win this honor.

In closing, I wish to thank all those who have assisted me and cooperated with me during the year: Superintendent of Schools and High School Principal; Mr. Walker for his help in coaching the basketball team; Mr. Phillip Nadeau, whose assistance with the football team was invaluable; and the many alumni and high school students who have worked toward making our Physical Education program a success.

Respectfully submitted,

OLIVER J. ADAMS,
Director of Physical Education.

ANNUAL REPORT OF WORK IN HOME ECONOMICS

January 1 to December 1, 1937

TO THE SCHOOL COMMITTEE:

In submitting this, my second annual report, I wish to say that beginning with the fall term we have been guided by the revised Home Economics Program of Studios recommended by the New Hampshire State Board of Education.

The work is much the same as for previous years with a few additions and new arrangement.

For twelve weeks in the Spring of 1937 Rachel Hale, a student from the University, observed in this department and assisted with the demonstrations and teaching.

The excursions to stores have been especially valuable and we have found the owners very cooperative.

TEXTILES AND CLOTHING

Freshmen

This course is designed to give the girls ability in selection, construction and care of clothing appropriate to various occasions and individuals, to develop judgment in spending money wisely for clothing and household fabrics and to develop the desire to be attractive and well-groomed.

To aid the girls in acquiring these skills and developing judgment, the course is divided into several units. These units cover the following topics:—1. Clothing

selection; 2. Clothing purchase; 3. Clothing fabrics; 4. Clothing construction; 5. Clothing care; 6. Household fabrics; 7. Children's garments; 8. Leisure-time activities.

Visits to Woodman Institute and Pacific Mills were provided for the better understanding of early and present methods of fabric construction.

This fall we were supplied with a new text book which is very helpful and as up-to-date as its title suggests -- "Your Clothes and Personality."

The sewing projects completed in this course are: two undergarments, a cotton dress or blouse, a wool garment, and a silk or rayon garment. The wool garment is usually a skirt and the silk or rayon garment may be a blouse or dress. These garments enable the girls to solve a variety of sewing problems and to become acquainted with characteristics of the various fabrics.

FOODS AND NUTRITION

During the second year, the girls make a study of foods. This helps them to acquire an understanding of the specific food requirements for the various members of their families. It also helps them to develop judgment in selecting, preparing and serving foods appropriate for family groups and special occasions. Food budgets are considered for the purpose of bringing before the girls the necessity of spending money for food wisely. The entire course is designed to create within each girl the desire to become an intelligent consumer of food products.

The course includes the following units:

I. Nutrition and Food Selection.

This unit is designed to develop an understanding of personal and family food needs.

For practical experience the girls plan menus suitable for themselves and their families. In a great many cases these menus are actually prepared and served to their families for home project work.

II. Food Buying and Preservation.

This unit helps to develop an interest in food buying and to develop judgment in the selection of food and in planning how to spend the food money. It also includes the principles involved in food preservation and storage.

The girls are given the opportunity and are encouraged to visit the various stores and to observe the different prices and qualities of foods available. In some cases the girls choose "Marketing" for one of their home projects. This gives them an excellent opportunity to observe market conditions. In May, 1937, the girls visited Swift and Company's wholesale meat establishment where they were given an interesting and instructive talk on meat cuts and their uses.

During the Fall of 1937, the girls carried on a project in food preservation. Each girl brought from home materials for canning a vegetable, a fruit, and a conserve. The foods were successfully canned by the oven method and the girls are to have them for use in their homes.

III. Preparation and Serving of Family Meals.

This unit gives the girls an understanding of the basic principles involved in the preparation and serving of family meals. It also develops skill in the preparation and serving of foods.

Through laboratory work the girls are given the opportunity to actually serve "family size" meals. The girls first study the foods, their food values and preparation. The foods are then grouped into suitable and wholesome menu combinations, prepared and served to members of the class. At Christmas time the girls spend their laboratory time making candy of various kinds.

IV. The Kitchen.

Through the care and use of laboratory equipment this unit enables the girls to acquire judgment in this selection and the use of kitchen utensils and equipment. It also helps them to realize the importance of attractive and efficient working areas in a kitchen.

V. Meal Planning for Special Occasions.

This unit is quite closely connected with the unit on the planning and preparation of family meals. It gives the girls an understanding of table etiquette and social behavior, and enables them to acquire the ability to select and prepare appropriate meals for larger groups. It includes the study of table centerpieces and dining room decorations for special occasions.

In connection with this unit the following meals were served by the Foods Classes during 1937:

On Tuesday, June 8, 1937. A dinner for single teachers of Dover High School.

On Friday, October 20, 1937. A dinner for the Principals.

THE HOME, ITS CARE AND MANAGEMENT

Juniors

This course aims to help the girls develop managerial responsibility; judgment in the selection of household equipment and furnishings; ability to budget time and money; and the desire to maintain an attractive and orderly home.

The units are as follows: 1. House construction; 2. Furnishings; ability to budget time and money; and the desire to maintain an attractive and orderly home.

The units are as follows: 1. House construction; 2. Furnishing the house; 3. Management of the home; 4. Home finances; and, 5. Home grounds.

To make this course more real and interesting each girl draws a plan for a house and furnishes, decorates and equips it as the work progresses.

The experimental work in connection with methods and equipment for cleaning is done by caring for department furnishings and equipment and in combination with home projects.

In connection with the study of furniture an excursion to Marett's Furniture store was made where we enjoyed an informal talk which was interesting and enlightening.

In this study also, Mr. Flint of the Industrial Arts Department cooperated by lecturing on woods used in furniture, how to recognize them and how to judge furniture construction.

The grounds surrounding the houses were planned when this unit was covered. This included a study of trees, shrubs and flowers with the essentials necessary for their care and growth.

THE FAMILY AND ITS MEMBERS

Seniors

This course aims to develop desirable attitude toward family relationships and toward the community; to stimulate an understanding of the vocational opportunities open to women; and to stimulate an interest in the principles of child care and training.

To do this the course is divided into the following units: 1. Home membership; 2. The family and the community; 3. Choice of a vocation; 4. Care and training of young children; and, 5. Home nursing.

The study of each unit is based on work sheets with problems to be worked out individually and as class projects. This course is based chiefly on reference work and we have found current magazines very helpful.

In connection with the unit Care and Training of Children we observe small children and make a study of the educational material offered by the State and Federal Health Departments.

Home nursing involves practical experience in handling the sick and care of the bed which is obtained by using the equipment in the department and through home projects.

When studying Feeding the Sick suitable foods are prepared and served on trays.

HOME PROJECTS

Each girl completing any course in Home Economics has done the required home project work. Our state requirement is sixty hours yearly but often girls complete many more.

In most courses we have found several short projects more effective than one or two long ones.

The work is carried on with the approval of parent or guardian and frequent reports are made in class.

May I take this opportunity to express my appreciation to teachers, headmaster, superintendent and school committee for their cooperation in our work.

Respectfully submitted,

MARIAN E. FENERTY.

ANNUAL REPORT OF HOME ECONOMICS

in the Dover Grade Schools

TO THE SCHOOL COMMITTEE:

I have the honor to submit to you my fourteenth annual report of Home Economics as conducted in the Dover Grade Schools.

The work is so arranged that one hundred and ninety pupils receive a two-hour lesson each week, the seventh and eighth grades having a full year of instruction and each sixth grade, eighteen weeks. This schedule makes it possible for one instructor to supervise the work of two hundred and thirty pupils in the course of a school year.

The change in quarters which was made last year without undue expense to the city is a satisfactory one. The new classroom is by no means a model laboratory, but it possesses more advantages than disadvantages and serves its purpose effectively.

The subjects we touch are designated as cooking and sewing, but they are broad terms covering many interesting possibilities.

Canning is the first work of the fall term. This is followed by general cooking with later preparation of full meals in mind. Then six meals are planned, prepared and served by each of the two upper grades. As this work goes on throughout the year, the girls consider what is healthful and economical in foods and how such foods can be wholesomely prepared and served within an average family income.

Sewing is not only practice in the use of tools and patterns to acquire skill in handwork, but it offers many

opportunities of correlation with other interests of school and home. How are the materials made? Are they suitable from the standpoint of economy and good taste? How shall we care for the finished product to insure its wearing qualities and good appearance for a reasonable length of time?

For both subjects we have only twenty-four text books used yearly by over two hundred pupils. The student must have experience in finding information as well as learning it so pupils and instructor have assembled Posters, Wall Charts and illustrations. For example, we have:

1. A series of posters showing foods, the elements they contain and what they do for us.
2. Commercial and pupil exhibits of cotton, linen, wool, silk and rayon.
3. Wall charts and individual pictures showing top of a sewing machine and how to prepare it for stitching.
4. Photographic illustrations on table setting and etiquette.

Learning is never finished so education can only prepare our children to seek knowledge forever. Each lesson should represent a little more acquisition of skill and an increasing ability to find an answer to the problems we meet. With these ends in view we use the equipment and supplies of the laboratory to their utmost capacity. Therefore, we feel that public funds for this purpose are not wasted and the generous efforts of those who cooperate with us for the success of this work are not in vain.

Respectfully submitted,

MARY E. CAVANAUGH.

ANNUAL REPORT
of the
INSTRUCTOR OF INDUSTRIAL ARTS
for Grades Six, Seven and Eight

TO THE SUPERINTENDENT OF SCHOOLS:

The instructor of Industrial Arts for grades six, seven and eight presents his sixth annual report concerning the work of the Grade Shop.

The work of grade six has been confined to a project requiring practice in the use of a coping saw. This project offers a choice of a door stop or a broom holder designed from any of the following: dog, rabbit, or the comic characters -- Mutt, Jeff, or Jiggs. These are sawed with the coping saw, filed, sanded and assembled by the pupil and then finished in enamel colors, presenting a neat appearance. A second project is offered in the field of tin-can construction. Each pupil brings in a tin-can from which a cookie-cutter is constructed. Here again the pupil is offered a choice of several designs, as follows: cat, dog, squirrel, duck or rabbit.

In grade six, it has been found inadvisable to include a large amount of "related information." But, an attempt has been made to develop safety consciousness and a desire to have a completed project worthy of the effort expended upon the project.

Beginning in grade seven and continuing through grade eight, the pupils are presented units of work or instruction comparable to their abilities and which will

increase the number of experiences in the use of the various woodworking tools. An effort is being made to teach that "related information" which has been recommended by the Committee on Standards of Attainment in Industrial Arts Teaching of the American Vocational Association. This "related information" is planned to be taught through or by the use of the following methods: (a) individual instruction; (b) group or class instruction; (c) information or instruction sheets; and (d) library reference. The first two methods are the most frequently used. The last two methods are rarely used because of the lack of adequate facilities especially the use of library reference is limited to those books which are contained in the personal library of the instructor. The use of the individual and group methods of instruction of the teaching of "related information" follow quite closely the conditions as found by the writer in a study made of the teaching of "related information" in the schools of Maine, New Hampshire and Vermont. This study revealed that of the number reporting, 84 percent of the teachers used the group or class method of teaching "related information" and 64 percent also used the individual method of instruction. The individual method presents the information when it is most needed.

The instructor has found that the use of the course of study as on file in the office of the Superintendent of Schools is beginning to show results in the type of work being produced or accomplished since the opening of the present school year (September, 1937.) Many of the pupils in grade eight are selecting and completing projects which require a greater variety of tool processes and which possess better design and greater utilitarian values. Also a better type of craftsmanship is paralleling these increased experiences.

The use of the shop personnel has created, in a

larger number of individuals, a keener sense of responsibility.

Although the number of pupils in grade eight is the smallest since the reports of 1929 and 1930, the indications are such that the classes in both grades seven and eight will be large during the next school year.

The shop remains greatly handicapped in the provisions for personal cleanliness of the pupils. The pupils have two alternatives: one is to return to their respective classes or homes with hands soiled with paints or stains; the other is to use the facilities of the high school wood shop which necessitates passage through that part of the shop in which pupils are at work. Such passage gives rise to the possibilities of a grade school pupil while working at his bench unintentionally bump a high school pupil. Such bumping might easily result in minor and possibly a major injury to one or both individuals. The same condition exists in the passage of grade school pupils to the toilets in the basement of the high school annex.

A large amount of the replacement of tools has been eliminated by the establishment of the pupil personnel. Such elimination has further reduced the small replacement costs of the grade shop. Every year in considering replacement or repair requisitions, the fact arises that such can be further reduced by the replacement of wood handles on the bench planes with handles cast from aluminum. Such handles may be cast in the pattern shop of the high school at a cost nearly equal to the replacement cost of the wooden handles. Such cost need not be large at any one period as such handles might easily be replaced in small quantities at one time.

An effort is being made to have pupils of grades seven and eight choose from a greater variety of projects to enable them to learn a greater number of tool

procesess. With this in mind, pupils are encouraged to suggest projects for their own construction, which prove through careful analysis to bring about those desired experiences as outlined in the units in the course of study.

The purchase of a 24-inch jig saw with motor would speed up production of the shop and would also increase the variety of projects which might be completed by the pupils. The initial cost of such a machine would not exceed the sum of fifty dollars (50) for one of the latest machines of the "Driver" line of bench machines and such a purchase would be warranted for service use in the grade shop in the past ten years. Such a purchase spread over a ten-year period serving an average of over 200 pupils would represent a cost of less than two and one-half cent per pupil.

The instructor, in closing this report, wishes to acknowledge his appreciation of the cooperation of the shop teachers, class room teachers, the headmaster of the high school and the Superintendent of Schools.

Respectfully submitted,

HAROLD C. BINGHAM.

ANNUAL REPORT OF ART SUPERVISOR

TO THE SCHOOL COMMITTEE:

I herewith submit my second annual report of work accomplished in the Art Department of the Dover public schools.

In general the program in the primary grades consisted of problems and projects covering these required divisions of instruction: color theory, design, representation, construction, picture study and handicraft. This year it was possible to carry out a more complete and varied program because of the new supply of water-colors, and also the miniature reproductions of some of the famous paintings. The upper grades had the opportunity to use the paints first -- this being an initial experience for them.

Examples of correlation with other school subjects are the large murals done on cloth with crayons by pupils in the rural schools, depicting scenes in early American History; friezes by sixth grade pupils showing pictures from Egyptian, Greek and Roman History, and large illustrations from "A Dog of Flanders" and "Pinocchio."

A project in wood carving was tried for the first time in the eighth grade at the Sherman School. Each pupil carved a bas-relief of the profile of Lincoln. The venture was quite successful despite the lack of suitable tools.

The lessons given at the High School have from necessity been rather varied since attendance is non-compulsory and therefore irregular. In brief, the course

covered the following: principles of design, chalk drawings, watercolor painting, pen and pencil technique, figure drawing, perspective, lettering, woodcarving and soap carving.

I would like to add to this a course in metal work and jewelry, which I think would prove very practical and successful.

I wish to express my appreciation to all the teachers for their help and cooperation.

Respectfully submitted,

ELEANOR L. BUZZELL.

ANNUAL REPORT OF THE SCHOOL NURSE

I respectfully submit my fourth annual report from January, 1936, to December 1, 1937.

This report is a resume of my activities covering eleven schools and 1979 pupils.

Total number of visits to schools, 939.

On November 9th, a clinic for the Toxoid Innoculation against Diphtheria was held under the direction of

the Dover District Nurses' Association. Approximately 265 pre-school children were inoculated and in addition a few school children who were ill at the time of the last clinic. The importance of having the children inoculated was demonstrated when a case of Diphtheria occurred in one of the schools this fall. All the pupils in the room who had not been inoculated were excluded from school for 7 days from the day the affected pupil was in school. With the assistance of Dr. Walck, city physician, nose and throat cultures of these exposed pupils were taken. These cultures were then sent to the State Board of Health in Concord where they were analyzed and a report sent back to us. The contacts were not allowed to return to school until we received a negative report on the throat culture. The students who had been inoculated were considered as immune to the disease and remained in school. In my opinion parents should take advantage of these clinics and have their children inoculated against these diseases. There are some contagious diseases which cannot be prevented by inoculation but those that can be should be. It not only keeps the child from his studies and outdoor pastimes but often leaves a child with a weakness which is a severe handicap.

A new phase of my work which has interested me greatly this year is my connection with the Crippled Children Society of New Hampshire and the Roosevelt Paralysis Fund of Dover. These two organizations have made it possible to take every crippled child in school to the Dr. Ezra Jones' Clinic at the Elliot Hospital in Manchester. At this clinic the children are given a complete examination by either Dr. Jones or Dr. Friberg. These doctors recommend treatments, exercises or braces and in some cases operative measures are needed to straighten the limbs paralyzed by infantile or some other cause. All except four of our crippled

children in the schools have been to this clinic and have either undergone operations or received advice. Before the end of the year I hope to have had all the crippled children in school attend this clinic. It is most satisfying to take a child affected with torticollis, congenital hip or some paralysis from infantile to this hospital for an operation. After two or three weeks the child returns home with the affected part in a cast and then later when the cast is removed to find a straight sound limb in place of a twisted and painful one. It is most gratifying to observe the joy of the parents and the children to find he can walk, run and play as his friends do. It is a pleasure to have two such societies to help us in the corrections of defects.

At the Nurses section of the Teachers' Convention at Nashua, a representative of the National Society for the Prevention of Blindness demonstrated an apparatus for testing vision in the schools. Under the present testing method it is necessary to have a bright sunny day for the pupil to see the chart. If an electric light is used over the chart it may affect the child's eyes so they cannot see the letters properly. Due to the crowded conditions in the schools, physical examinations are made in dressing rooms under most adverse conditions due to inferior light. Much of the dissatisfaction resulting from the present method of examining eyes could be eliminated in my opinion by the addition to the school equipment of a recently perfected vision testing cabinet which may be purchased at a price approximately twice the cost of a pair of glasses. One of these has been in use at Portsmouth for several months with very satisfactory results. The cabinet is about as large as a suitcase, is equipped with two long frosted bulbs which run lengthwise of the cabinet. It is easily transported and may be plugged into any electric light socket. Irrespective of the lighting conditions in the room where it is

used the apparatus eliminates all shadows and the child has a well-lighted chart to look at with no eye strain involved. I feel certain a cabinet could be used to advantage in Dover and would result in a very decided improvement over the present method. Sending a card notifying parents a child has impaired eyesight is one of the things a school nurse has to consider carefully. While the child's vision may appear defective in a school test under the present method, it might prove otherwise if tested under proper lights.

I wish to express my sincere appreciation for the help and cooperation I have received from Superintendent of Schools, Headmaster of the High School, members of the school board, teachers in the various schools, and Dr. Walck.

Respectfully submitted,

MARGUERITE M. DAWSON, R. N.

School Nurse.

ANNUAL REPORT
of the
INDUSTRIAL ARTS DEPARTMENT

TO THE SUPERINTENDENT OF SCHOOLS:

The following report of the Industrial Arts Department is herewith submitted to you.

The course of studies as outlined by the Smithes Hughes Act of the Federal Government and which is being carried out in all departments is as follows: twelve and one-half clock-hours of shop work, two hours of mechanical drawing, and four hours of related mathematics. There is an exception for some boys who elect the subject they are most interested in for two periods per day, which gives them a credit the same as any other subject offered in the academic curriculum. There are 19 boys availing themselves of this opportunity.

The enrollment at the present time in the different shops is as follows:

Industrial		Industrial Arts	Seniors
Cabinet Shop	39	16	2
Pattern Shop	19	0	0
Machine Shop	19	1	1
Auto Shop	14	0	7
Electric Shop	14	2	4

Mechanical Drawing is required of all.

As the seniors are allowed the privilege of electing the type of work that appeals to them, we have one industrial boy and two industrial arts boys who have

chosen drawing. This brings our total enrollment up to 141, which is 30 per cent of the total number of boys in school.

We have made a slight change in the schedule of Mechanical Drawing this year. Instead of the boys reporting to class each week for a two-hour period, we are having, as far as possible, the classes meet for a shop week at a time which gives the necessary number of hours required for the six weeks' marking period. In the past where there has been five different instructors using the rooms at different periods each week, it has caused more or less confusion. While we are not able to overcome this situation entirely, this procedure has eliminated some of the difficulties. We also feel that we are able to accomplish more. There is still a problem which cannot be overcome unless we have one instructor to handle all classes as we do in the other shops. This applies to supervision of the boys who elect the subject as a unit and the general care of the room.

In the cabinet shop the instructors endeavor to give such related information that is applied to the shop activities, devoting just such time they feel is necessary and giving it at a time when it is most applicable to the work that is being done.

The usual type of projects has been made or is under construction, but due to the addition of two new books on modern furniture design there has been a divided improvement in the style of project the boys have chosen.

If it were possible to obtain any new equipment for this shop, a small shaper and jig saw would greatly improve the type of furniture made as some of the curves and shapes are almost impossible to form by hand. It might be mentioned here that the Freshman

boys are not allowed to operate any of the dangerous power driven machines. The only ones they operate are the hollow chisel mortizer and the wood turning lathes. The latter in most cases are unsafe for a student to operate as they are out of date and worn out. These machines could be replaced by a smaller modern machine for about \$60 each. Through the cooperation of the pattern and machine shops, an attempt is being made to rebuild one of these machines. If successful this will cost approximately \$30.

Instruction trips have been taken to D'Arcy Company and Mathes Lumber Company, local industrial plants. These trips are both interesting and profitable to the boys, and the instructors wish it were possible to make more of them. However, other trips are being planned.

For further information in regard to the activities in the other shops the writer refers you to the reports as submitted by each of the instructors.

In closing this report I wish to express my appreciation for the cooperation of all concerned.

Respectfully submitted,

EARL S. FLANDERS.

ANNUAL REPORT OF THE ELECTRIC SHOP

Industrial Department

In order to give the reader of this report a comprehensive view of the course as now outlined, I wish first to call to your attention the objectives upon which the course is built. The course is founded upon the seven cardinal principles of education, namely: Health, Vocation, Avocation, Character, Worthy Home Membership, Citizenship and Command of Fundamental Processes.

The writer wishes to show briefly how the realization of each of the above objectives is obtained. The first objective is health. This is aimed at through the instruction in electric refrigeration, summer and winter air conditioning. Health may be further subdivided into eye hygiene. This subject is approached through the study of kinds and types of light best suited for the preservation of sight.

Since the average boy knows very little as how he will make his living after leaving high school the second objective, vocation, must be broad in its scope of learning.

The course as now outlined, the writer believes, meets the current problem of a broad comprehensive electrical training. The work is not organized with a view of preparing the pupil for a specific electrical vocation. The time available is spent in giving him as broad an understanding as possible of electrical theory and its practical application.

The third objective, avocation, is realized by arousing an interest in electrical experiments, which may be

carried on at home, also through the radio page of many newspapers and magazines such as Popular Science. This objective is further realized through the medium of a Radio Club which conducts a meeting once each week usually held on Thursday evening from 7 to 9 o'clock.

The objective Character is developed in the shop by the pupils working with, sharing and helping his fellow workman accomplish their ends.

Good citizenship is brought about through the study of Motor Vehicle laws as applied to automobile lighting and "National Electrical Code." After studying these laws the pupil can better understand why such laws are enforced and that he lives in a better world because of their enactment.

The objective Worthy Home Membership can be very well realized in electric work. Every pupil is given instruction in the proper installation of various electrical fittings, selection of wire for a given appliance and how to use appliances properly. One of the ways in which the seventh objective is realized is through the medium of note books, electrical problems and reports upon various electrical processes.

The senior class of 1937 made many repairs in electric wiring in the machine shop, among these repairs were the installation of four lights over the bench. Before the lights were installed the light was of such a quality that a person working at the bench was working within his shadow. The batteries of six lathes in the machine shop were rewired. The previous wiring being B X which was so completely impregnated with oil that several fuses each week were blown because of dissolved insulation. The new wiring is housed in oil proof conduit pipe.

The 110 volt floor outlets in the machine shop have been replaced by over head duplex outlets. The over head outlets having the advantage of being accessible and free from fire hazard caused by steel chips and water from automobiles.

The department in 1936-1937 produced several projects of outstanding merit. Among these projects were an electric glue pot thermostatically controlled, the drawings, pattern and casting were developed by the pattern shop. The machining, buffing, design of electric heating unit and Walco bimetallic thermostat were made by the electric shop. Among these outstanding projects were a 6 or 12 volt 6 Ampere Tungar tube battery charger, a 6 volt battery booster, and several transformers.

One outstanding job was the electrical layout, estimating of cost and wiring of an eight room house. This job was carried to completion by the senior class.

To date the following field trips have been taken: Navy Yard, Portsmouth, N. H.; Franklin Plating Plant, Dover, N. H.; Power Plant, South Berwick, Maine; Kidder Press, Dover, N. H.; and the Jacona Power Boat, Newington, N. H. These trips are arranged to more closely correlate school shop activities and actual working conditions.

I wish to take this opportunity to suggest three items which are greatly needed in the electric shop. The first tool is a small Delta, Driver or similar type electric bench drill. The second tool is a $\frac{1}{4}$ H. P. electric grinder. The third item is a teaching aid namely, a 16 M. M. motion picture projector. Such a projector could be used by nearly every teacher in the high school. Sixteen millimeter films may be obtained for nearly every subject from the Bureau of Mines and from other agencies free of charge except for postage.

The related drawing for electricity consists of flat plate layout work, this involves the tracing of electrical circuits and the use of many symbols. Many house plans are developed, the pupil laying out location of lights, outlets, and estimates the cost of such an installation.

The drawing which relates to Mr. Crosby's auto mechanics consists of the drawing, tracing and blue printing of various automobile parts.

Many hours are spent by boys in the school shops outside of regular shop hours. Such time is devoted, some time to projects, some time to discussion of various electrical phenomena, with their instructor, and again for the purpose of working out some complex electrical problem which they have become self interested in.

Respectfully submitted,

EMERSON A. McCOURT.

ANNUAL REPORT OF THE MACHINE SHOP

OBJECTIVES :

1. To develop a wholesome attitude toward manual work.
2. To gain knowledge and skill in the use of tools.
3. To gain knowledge and skill in the care and operation of machines.
4. To acquire a degree of accuracy in the making of small tools and machines in repair work.
5. To give the student a general idea of machine work, as a means of making living.

MACHINE SHOP

At the beginning of the school year of 1936, the lack of the necessary small tools, the very poor condition of the machines and other equipment presented a rather difficult problem in teaching a course in machine shop. However, many new small tools were purchased which made it possible for us to start on repairing the machines.

Each machine was checked over, the necessary new parts made whenever possible, and finally the machines painted and put into operation. In making these repairs the students had a chance to learn how the various machines were made and to make the actual parts themselves. This in my opinion is superior to mere practice work. At the present time every machine except one is in running condition although some are very inaccurate and beyond further repair.

A new tool room has been made for both auto and machine tools. This makes it possible to keep a very

close check on all small tools. As a result only one small tool was lost last year.

As a part of the machine shop course I have taught welding to a picked group, with some degree of success. Welding offers a broad field to any boy interested in it.

I have listed below some of the jobs and projects we have completed:

Repair Jobs.

Turned and cut reduction gear for lathe.
 Milled and cut racks for lathe apron.
 Machined new tool posts for lathes.
 Machined yoke for shaper.
 Machined and cut rack and gear for arbor press.
 Welded and rebuilt apron for lathe.
 Machined four thrust washers for vertical lift on milling machine.
 Turned and ground lathe centers.
 Machined new nuts for bench vises.
 Surfaced several surface plates.
 Sharpened all usable milling cutters.
 Made new milling cutter rack.
 Cut new gears for automatic feed in lathe.
 Machined new back gear shifter for lathe.
 Made guards for dangerous gears, belts, etc.
 Replanked long bench near window.
 Mounted new motor on lathe and converted into gear drive.
 Overhauled spindle bearings on universal grinder.
 Repaired drive gears on planer.
 Removed and repaired oil pump on large miller.
 Made new automatic shut-off arm for power hack saw.
 Machined drill press vise.

Small tools made.

Cold chisel set.	Depth gauge.
Center punches.	Bushing punches.

Ball pein hammer.	Tapered reamer.
Pin punches.	Parallel clamps.
V-Blocks	

AUTO MECHANICS

GENERAL OBJECTIVES: •

1. To develop a wholesome attitude toward manual work.
2. To create an interest in the design, construction and repair of the automobile.
3. To gain an understanding of the theory of the mechanical and electrical feature of the automobile.
4. To develop through actual practice a degree of skill in making repairs on the automobile.
5. To give a student a general idea of auto repair work as a means of making a living.

During the past school year the auto mechanics classes have completed a great many repair jobs ranging from very minor adjustments to a complete overhauling. With the absence of a text book it was necessary to teach the theory along with the actual repair work as the problem arose. This slowed down the work to a certain extent yet I feel the knowledge gained by the student was very worthwhile.

Most of the cars brought into the shop for repairs belonged to the students or teachers. Some, of course, were brought in by outsiders. I have not encouraged much outside work as I feel the school should not compete with the local repair men.

Several of the boys have taken old cars and converted them into tractors. Odd pieces have been picked up here and there at a very low cost. This makes a useful as well as a very educational project.

Our small tool equipment for automotive repair work is very complete. However, we do lack many of

the special tools and testing equipment. This equipment is costly and is constantly being replaced with new, so that the cost might possibly be prohibitive.

A new set of text books were added this year. They have proved a great deal of value in putting across the theory and design of the modern automobile.

The lift jack we are using is practically worn out and is really a hazard.

Our valve grinding and refacing equipment is inaccurate and incomplete. Both of these items should be replaced in the near future.

I have listed below a few of the repair jobs we have completed and a few of the teaching units I have incorporated into the course.

Repair Jobs.

- Planned the procedure in doing a job.

- Tested and cleaned a spark plug.

- Cleaned and adjusted breaker-points.

- Greased a car.

- Changed oil in engine.

- Washed and polished a car.

- Ironed out dents or bends in fenders or body.

- Retouched scratches or damage to finish.

- Repacked water-pump glands.

- Replaced water-manifold gasket.

- Cleaned gasoline lines.

- Replaced light bulbs.

- Tested and adjusted lights.

- Adjusted valve clearance in L-head motors.

- Adjusted valve clearance in valve-in-head motors.

- Removed sediment from radiator.

- Tested and cared for a battery.

- Adjusted tension on a fan belt.

- Removed and replaced a tire.

- Repaired puncture with cold patch.

Repaired puncture with hot patch.
Inserted boot in casing.
Aligned front wheels.
Inspected and adjusted front-wheel bearing.
Tested and corrected lost motion in steering mechanism.
Inspected and adjusted a clutch.
Removed and inspected a floating rear axle.
Removed and inspected a semifloating axle.
Inspected and adjusted the differential.
Adjusted the mechanical brakes.
Adjusted the hydraulic brakes.
Adjusted main bearing.
Adjusted connecting-rod bearings.
Scraped a bearing.
Timed valves.
Ground valves.
Refaced and reseated valves.
Traced lines of power from battery to engine for starting.
Traced lines of power from engine to battery for charging.
Traced lines of power from engine to distributor.
Traced lines of power from engine to wheels.
Inspected a vacuum-tank.
Inspected a fuel-pump.
Cleaned and adjusted a carburetor.
Traced and tested the lighting system.
Traced and tested the ignition system.
Located and repaired a short circuit in the electrical system.
Located an open circuit in the electrical system.
Tested an ignition-coil.
Changed the charging rate of generator.
Cleaned commutator.

Teaching Units.

- The types and uses of anti-friction bearings.
- What is meant by camber, caster, and toe-in, and how they effect the operation of a car.
- The principle of the worm-gear and how it is applied to the steering-gear.
- How the cam-and-lever type of steering-gear works.
- How the planetary type of steering-gear works.
- The different types of clutch and how they work.
- The universal joint and how it works.
- How the gear-shift transmission works.
- How the planetary transmission works.
- How the free-wheeling device works.
- How the differential works.
- The meaning of gear ratio and its effect on power and speed.
- The different types of axles.
- The different types of brakes and the principal characteristics of each.
- The types of engine bearings and the reasons for using such bearings.
- The kinds of pistons, types of rings, their purpose and characteristics.
- The meaning of cycle in a gas engine.
- The sleeve-valve mechanism and how it works.
- How the vacuum-tanks work.
- How the fuel-pump works.
- The purpose of the carburetor and how it works.
- The necessity for proper lubrication and how it is accomplished.
- How the starting-system works.
- How the lighting-system works.
- How the ignition-system works.
- Safety precautions in driving.
- Principal of knee action.

Automatic choke.
Automatic transmission.
Air conditioning.

PATTERN MAKING

In submitting this report I will state briefly the aims of my subjects and what has been accomplished in realizing them.

In the first year of High School we bring together children from several smaller schools. They learn here to live together and be useful to themselves and the community. The shop personnel system gives to each a duty to perform for the good of all and teaches a sense of responsibility.

In the making of articles of furniture stress is laid on proper manipulation of hand tools and safety measures. The correct names of tools and the estimating of cost is an important phase. With the introduction, this year, of two new project books on modern furniture an improvement in the choice of projects is noted. Some of the projects under construction are smoking cabinets, modernistic bedside stands, hanging wall shelves, corner shelves, magazine end tables, floor lamps, chests, costumers, and sewing cabinets. Red gum is the favorite wood used this year. I cannot too strongly urge the purchase of a large jig-saw and a shaper to give the work a real workman-like appearance. These two machines could be bought for \$115.00 and would be used every day to good advantage. In keeping with present day practices the shops need a paint spraying outfit.

The course in pattern making is the best example we have of shop correlation. I will cite the making of a small glue pot to illustration. This job was designed and drawn up in the drafting room and blue printed; then the patterns and core boxes were made in the shop. Next castings were made of aluminum in the shop and

last the castings were machined and the electrical unit designed and installed in the electrical shop. Other examples of this correlation are: four step cone pulley for V belt to rebuild an old lathe; copper anodes for the electro plating course; bronze bearings; complete castings for a drum sender; demonstration micrometers; V belt pulleys for a buffing wheel; plane handles; and electric weather vane. These and others were cast by the boys in the pattern shop making their own molds and pouring the metal. Patterns are also made for machine parts to be cast at the foundry in cast iron, such as table for large drill press, table support for small drill press, surface plates, machinists vise, small lathe head, etc. All of these jobs require a drawing and blue print and provide teaching material in other shops than the pattern shop. One boy is designing and making patterns for an invention he hopes to patent. He will cast and machine this job himself. This course is only for one-half year so it cannot be expected that we will produce experts in that time. We can only teach the fundamentals and an appreciation of the trade. By exploitation the boy discovers his aptitudes or inaptitudes for the work.

In conclusion, we must remember that we are not so much concerned with turning out an expert craftsman as we are in developing a better and more useful citizen.

Respectfully submitted,

DANIEL FLINT.

TRUANT OFFICER'S REPORT

School Year 1937

TO THE SCHOOL COMMITTEE:

I respectfully submit the following report:

Number of complaints from Teachers	208
Number of complaints from the Superintendent . .	0
Number of complaints from members of the School Committee	0
Number of complaints from St. Mary's Academy . .	23
Number of complaints from St. Charles' School . .	12
Number of complaints from other sources	0
Whole number of complaints received	208
Number of cases of absence investigated	208
Number of cases of tardiness investigated	0
Number of children found absent without good reason	35
Number found to be truant	35
Number found at work illegally	0
Number of visits to schools	208
Number of visits to families	208
Number of visits to manufacturing establishments	41
Number of arrests	0
Number of children prosecuted	0
Number of parents prosecuted	0
Number of employers prosecuted	0

THOMAS J. McLIN,

Truant Officer.

PINE HILL CEMETERY

REPORT OF THE SUPERINTENDENT

DOVER, N. H., December 31, 1937.

TO THE TRUSTEES:

I have the honor to submit the annual report of the Superintendent of this department for the year 1937.

The WPA Project in the New Part, which was suspended in the Fall of 1936, was reopened in January to give work to the unemployed, as this was the only project with an unexpended balance.

Owing to the cold weather and the frozen ground not much could be accomplished until Spring, with the exception of the grading of the roads. Work continued until August 3rd, at which time the project was closed, all the desirable land in that location having been graded.

Judging from the past, I estimate that there are enough lots available to meet the requirements for the next fifty years.

Our contribution to this Project amounted to \$2,716.94, which amount came from the earnings of this Department.

During the Summer we graded thirty-two lots: twelve for private owners, and twenty which were under perpetual care. Also, we cleaned the stones on many lots, greatly improving the appearance of the cemetery.

There was not as much monumental work this year as formerly, owing, I suppose, to the depression.

In the Fall we set out forty-five maple trees in the New Part, and expected to set out twenty-five blue spruces which had been ordered for Fall delivery, but owing to the dry weather they could not be shipped. We expect that they will arrive early this coming Spring.

The water mains were extended to allow one faucet on Ave. T, North, and one on Ave. U, North -- the only sections not adequately provided for; three catch basins have been put in, one at the corner of Ave. A and the South Ave., and two on the Main Ave. at the junction of Avenues D & E.

All our spare time during the Fall was expended on the Watson Street side, in trying to improve the unsightly view from that section. The banking has been graded from Central Ave. to Ave. P, parts of which have been seeded. We plan to continue this work as time is available.

During the year (1937) all the roads in the New Part were graveled, as well as the North & South Avenues, and Avenues M, O & P in the Old Part. We plan to continue this work until all have been done, taking the worst ones first. We hope in a few years' time to be able to eliminate the muddy conditions which have always prevailed.

Thirteen lots in the Old Part have been put in Perpetual Care; and additional funds added to four others.

Attached is a list of the bodies placed in my care, showing the exact location of each interment.

I wish to express my appreciation of your loyal support and assistance rendered me in the discharge of my duties throughout the year.

ANNUAL REPORT
of the
BOARD OF TRUSTEES

TO THE CITY COUNCILS OF THE CITY OF DOVER:

The Trustees of the Dover Public Library herewith submit their annual report:

The personnel of the Board of Trustees and the Library Staff remain the same as last year, and the affairs of the Library have been efficiently and prudently administered.

There has been recently established a Branch Library at 612 Central Avenue, which is open on Saturday afternoons. It is meeting with much favor with the residents in that section.

The increase in the circulation of books and magazines for 1937 has been noted by the Trustees with great satisfaction.

There has been installed in the Library an oil heating plant which is giving good results and adds to the comfort of the patrons.

For full details pertaining to the work of the Library we would refer you to the report of the Librarian, which with the report of the Treasurer is appended to and made a part of this report.

For the Trustees,

CLARENCE I. HURD,

Secretary.

FINANCE COMMITTEE'S REPORT

TO THE TRUSTEES OF THE DOVER PUBLIC LIBRARY:

This is to certify that we have examined the financial accounts of Margaret M. Redden, treasurer, and Beatrice M. G. Jenkins, librarian, from January 1 to December 31, 1937, and find them to be correctly cast and properly vouched.

ROSE V. CONNELLY,
SAMUEL B. BLAIR,
Finance Committee.

Dover, N. H., December 31, 1937.

DOVER PUBLIC LIBRARY

REPORT OF LIBRARIAN

TO THE BOARD OF TRUSTEES OF THE DOVER PUBLIC
LIBRARY:

Gentlemen:—The report of the librarian showing
the work of the library for the year 1937 is herewith
presented:

THE YEAR'S GROWTH

Whole number of volumes, January 1, 1937	59,753
Volumes purchased	644
Volumes received by gift	105
Bound periodicals	71
	<hr/>
Total number of accessions	820
Received from U. S. Government, 2,000 volumes and pamphlets.	
Worn out volumes	219
	<hr/>
Total increase for the year	601
Total number of accessioned volumes, December 31, 1937	60,354

THE YEAR'S WORK

The total circulation for 1937 was 87,887, a gain
over the preceding year of 7,593, the largest in the his-
tory of the library. Of this number 19,355 volumes
were sent from the Children's Room.

The attendance for the year was 33,079 of which 14,629 came to the Children's Room, and 449 used the Reading Room on Sundays during the months from the first of October to July.

The registration also showed a gain as there were 640 in 1937 against 572 in 1936. Of these 391 were adults and 249 were children. Eighteen out-of-town borrowers paid for annual subscriptions, 3 more than during last year.

The increase in circulation is mainly due to an interesting experiment begun in May. As the early months of the year had brought a continuation of the falling off in the children's reading it was felt that an effort should be made to change this trend if possible, and with the approval of the trustees and superintendent of schools, and the cooperation of the teachers a service to the grade schools was inaugurated. Following a custom practiced in many other cities, it was arranged to carry books to all the grammar grades with the exception of those in a near-by building and to most of the primary grades of the city. As there were 27 grades that came within the purpose of the plan, and as 25 books were sent out to each grade, and as it was desirable that the books should be got out as soon as possible some strenuous hours ensued. Every member of the library staff lent a hand and the janitor was impressed into the work of loading and unloading the books for their transportation in an automobile.

The service met with a welcome in all the schools, especially in those with a large proportion of foreign children. It has been continued throughout the year and has proved most satisfactory. The books were selected from the Children's Room by Miss Parker and some of the results as reported by her are worthy of note. She states that there was very soon observable a quickening of interest in reading shown by the children

and that a noticeably longer use of the room was made during the early summer months, when usually outdoor attractions prove more alluring than those of indoors. It was further gratifying that many worthwhile books which had, somehow, just missed catching the children's fancy were, when sent to the schools, read and liked by them.

A hope had been entertained that the children who were brought to the schools in busses and had no time to come to the library between sessions might be benefited by this accessibility to the book collections. This has proved to be the case and it is considered one of the important phases of the experiment.

At the request of some of the parents in the Back River district, this service was kept up through the summer months and books for adults were added. These books were shelved and cared for in the house of Mrs. John F. Kelly whose interest and help was largely responsible for the success of the undertaking.

Continuing an annual practice, instruction in the use of the library was given to members of the Freshman classes of the public and parochial schools. These talks have proved most valuable in helping the students make the transition from grammar to the high school methods of study and in enabling them to find more readily for themselves material in books and magazines.

Considered of importance in the year's work has been the preparation of notices of the new books which go into circulation every Tuesday afternoon, except through July and August. They are written by the librarian and assistants in turn and are published in the Monday issues of the local paper. They have come to be depended on as suggestions for reading by many of the library's patrons.

The Inter-library loan service, now growing in importance, has been shared in by this library both in a borrowing and lending capacity. To meet requests for technical and other books which it did not have it has drawn upon the New Hampshire State Library at Concord, and the New Hampshire University at Durham and has lent for use by the State Library a number of books and pieces of music.

BOOK STATION

Realizing that although the library is centrally located there are many citizens who do not make as much use of it as they might because of their distance from it, an effort was made to meet this situation. Through the interest and kindness of Mr. George C. Sanborn a book space was furnished free in his grocery store on the north side of the City at 612 Central Avenue, a location well placed in the center of many residential streets. Beginning October 15th on every Saturday afternoon from 3 to 6 o'clock a generous selection of books in charge of an assistant has been taken to the station. Registrations have been made there as at the main library. Although it has been in operation less than three months a steadily widening circle of patrons has indicated an increasing appreciation of its possibilities.

MEETINGS IN THE LECTURE HALL

On several occasions during the past year the library has had the pleasure of opening its Lecture Hall for gatherings.

On March 24th many members of the New Hampshire Federation of Garden Clubs met in Dover as guests of the Granite State Garden Club of this city, and held their afternoon session in the Lecture Hall. This was an open meeting and a large audience gathered

to listen to illustrated talks by Mr. J. Allen Chapman, president of the hostess club on "Our Native Wild Orchids," and by Mrs. William Champlin, an officer of the federation on the "High Lights of the New York Judging School."

Later in March a talk on "Winter Birds" was given by Mrs. Harlan N. Bisbee of Durham whose long observation of New England bird-life enabled her to give her audience unusual and intimate glimpses of bird-ways.

While these earlier meetings were of general interest a gathering of special importance to this library and those of the neighboring towns was held during the morning and afternoon of October 29th. This was a district meeting of librarians and trustees and was largely attended. The speakers were Miss Margaret Grant, Executive Secretary of the New Hampshire Public Library Commission, whose subject was "State aid for Libraries;" Miss Thelma Brackett, Librarian of the New Hampshire State Library who spoke on the "Development and possibilities of inter-library loans;" Miss Lillian Parshley of the Rochester Public Library who read an interesting paper on "Some of the outstanding recent books," and Professor Harlan N. Bisbee of the University of New Hampshire gave a talk on "Some modern trends in education."

A round table discussion was conducted by Miss Hannah G. Fernald of the Portsmouth Public Library, and the formal program was concluded by a business meeting conducted by Miss Lillian A. Odell of the Weeks Memorial Library of Greenland, at which it was voted to combine Districts No. 9 and 14 and the following officers were elected: Miss Lillian Parshley, chairman; Mrs. Margaret F. Seavey of North Hampton, secretary. Luncheon was provided at the Hayescroft Inn, Barrington.

At the close of the meeting Mrs. John C. Lawlor, a member of the board of trustees, met the guests in the Trustees Room where refreshments were served.

CIRCULATION DEPARTMENT

Miss Morrison, in charge.

In spite of an irregular course of very large and quite small months, the circulation in this department shows an increase of 342, its total being 68,334 against 67,992 for last year. This makes a nearly continuous gain for ten years, only 1928 and 1929 having closed with losses. Another noteworthy record of this period is shown in the small number of books lost. During the ten years only 17 books were not eventually recovered from forgetful or indifferent borrowers.

Many groups of books, supplemented with mounted pictures have been displayed and it has been found that such groups with suggestive signs have attracted the attention of borrowers. One group renewed each Saturday afternoon with the invitation "Take along a book for the week end" was especially effective and the books offered were quickly taken.

Work with the High Schools has continued to hold a large place in the daily routine of the department. Seven thousand requests for permission to go to the shelves have been made, and an uncounted number of questions having to do with school studies have been met. Books have been put aside for special subjects of study and many of those on the regular required reading lists have been placed on easily accessible shelves.

Through the interest of the New Hampshire Public Library Commission a W. P. A. worker, Miss Virginia Hall, has continued with the library through the year. Her experience which has extended over parts of several years and her aptitude have made her a valued addition

to the staff, especially in the circulation department where most of her duties have been.

CHILDREN'S ROOM

Miss Parker, in charge.

During the greater part of the year this attractively furnished and well-stocked room has been a busy center. This has been especially true of the fall and winter months when children crowded around the librarian's desk several rows deep while others sat at the small tables, absorbed in books or picture puzzles or stereoscopic views. The service to the schools, while it has brought a welcome use of its books has drawn heavily upon its resources, especially upon the supply of books for young readers. To meet this development many volumes have been bought for the smaller visitors and the largest purchase of juvenile literature ever made by the library was ordered in anticipation of Book Week. With their attractive bindings and delightful illustrations these additions increased the pleasure of a time especially devoted to children's reading. Book Week was further marked by an innovation in the observance of its concluding Saturday afternoon when instead of story telling or plays by the children, moving pictures were shown. Two films, "The Wee Scotch Piper" and "The Most Northern People in the World" were rented and through the kindness of Mrs. John C. Lawlor were thrown on the screen with which the Lecture Hall is provided. Over two hundred children crowded the Hall and gave vigorous and frequent evidence of their enjoyment.

Through the courtesy of the J. E. Lothrop Piano Company a very fine radio was installed in the Children's Room for use during the Coronation Ceremonies. This afforded an opportunity highly valued.

Two purchases were made from the Children's Picture Fund left by Miss Caroline H. Garland. One included 40 pictures illustrating "Knighthood Life in Medieval Times" and "Colonial America." The other consisted of a complete set of Compton's "Pictured Teaching Materials." They will be of much value in work with the children and schools.

READING ROOM AND REFERENCE DEPARTMENT

Miss Leach, in charge.

The large and cheerful Reading Room in which are shelved most of the library's works of reference has had its attractiveness increased by the addition of several fine pictures which had been stored or hung in less frequented rooms and a recently received poster-reproduction of a painting by Maxwell Parrish, the gift of the New Hampshire State Planning and Development Commission.

Visitors to the room numbered 17,282 and while 10,107 of these were High School students, the general public made large use of it. The daily and weekly papers have been in constant demand and many visitors have come regularly to read the current magazines. Requests on specific subjects numbered 3,288. Most of them were in connection with school assignments, but many were presented by adult enquirers who wanted to know for example the authors of unfamiliar poems or sought information on questions of the day; and not infrequently a matter of argument was settled by facts found with the help of the reference librarian.

Among the Room's most valuable assets are the many indexes to books and periodicals. On its shelves are to be found the American Catalogue, one of the first publications to give in book form the author, title, price and publisher of the books then in print, and its succes-

sors the United States Catalogue, and most frequently consulted, the Readers Guide to Periodical Literature and the Cumulative Book Index. The Book Review Digest which gives summaries and critical estimates by eminent librarians of many new books also has a place here. The library is fortunate in having 56 of the 110 magazines listed in the latest Readers Guide. Many current and other Government publications are placed in racks in this room and the New Hampshire Register and The New Hampshire Manual of the General Court are so often found useful that they are also kept here.

As the various calls upon its resources indicate it is one of the most important departments of the library.

CATALOGUING

Miss Morrill, in charge.

It has been the policy of this library for many years to make its book purchases monthly, except in the months of July and August, and to have a certain number of volumes made ready for circulation each Tuesday afternoon. Brief notices of the week's offerings are published in the Monday issues of the local paper, and a typewritten list is placed where patrons may consult it. This plan has proved popular and has been helpful in the routine work. Books pass smoothly through the various stages of preparation and are quickly put before readers.

This year 820 volumes and pamphlets were added to the library and approximately 4,000 cards were made for them. While the cataloguing for the Children's Room is done by Miss Parker and that for the Historical Room by Miss Leach the classifying, shelf-listing, and typewriting of cards for the greater part of the year's additions are carried on by Miss Morrill who is in charge of the department.

HISTORICAL ROOM

Miss Leach, in charge.

The historical and genealogical material in this Room has been used during the year by more than 200 visitors, some of whom gave their residences as in distant states. Among them have been descendants of Revolutionary soldiers who desire to join the Daughters of the American Revolution, professional genealogists, and many who simply come for the pleasure of filling out family histories. A number of these visitors had ancestors who were among the early settlers of Dover. They found in the local records items of particular interest and value.

Probably two of the most frequently consulted sources of Dover genealogy are the "Historical Memoranda Concerning Persons and Places in Old Dover," by Dr. Alonzo H. Quint, first published in the *Enquirer* 1850 to 1888, and a manuscript copy of New Hampshire Marriages, 1623-1823, compiled during many years of investigation by Dr. John R. Ham whose invaluable collection of local history was presented to the library by Elisha R. Brown, a former trustee of the library and for many years president of the Strafford National Bank. Four scrap books containing clippings of the first publication in the *Enquirer* of Dr. Quint's articles are owned by this library, the gift of Mr. Harold Brown. The book form published by Mr. John Scales in 1900, then editor of the *Enquirer* does not contain all of these articles, hence the great value of the scrap books. The bound copy of the marriages gives a list of four thousand five hundred marriages in the towns that comprised old Dover prior to 1768. This also was presented to the library by Mr. Harold Brown, who owns the original manuscript.

Having a special interest for many of the older Dover residents is a Journal for the years 1739-1803 by

Samuel Lane of Stratham, edited by Charles Lane Hanson of Cambridge, Mass., and presented to the library by the New Hampshire Historical Society. The records included in this published edition of the Journal were kept by the great grandfather of Mr. Edmund V. Lane, of the firm of E. J. Lane, one of the oldest and longest established book and stationery stores of this city, a store which was serving the public in 1833 and did not go out of business until 1884. The Journal has a more than local value, as besides its domestic and personal items it reflects the religious, political and economic life of New England in the 18th century. Its publication was made possible in part by a legacy in the will of the late Anna Lane of Stratham, New Hampshire.

The genealogical volumes have been increased by the Glidden genealogy, compiled by Mr. George Walter Chamberlain, and donated by Mrs. E. A. Strong of San Mareno, California; Anthony Taylor of Hampton and some of his descendants, 1635-1935, compiled and published by Harold M. Taylor of Cranston, Rhode Island, presented to the library by Mr. Taylor; and two volumes of the Stone genealogy by Gordon Bartlett and presented by the Stone Family Association.

The variety of calls coming to this room for historical material is illustrated by two requests recently received, one for the date of Theodore Roosevelt's visit to Dover, and the other for the age of one of the old houses of Dover. A full and excellent account of the visit of the former president was found after some search in one of the local papers with a very good picture of Mr. Roosevelt in front of the American House and of the crowd gathered to hear him speak. The probable age of the house was brought within a certain period by reference to old directories and maps.

The files of newspapers kept in this Room get much handling and the leather backs of many of them become

so worn that the names and dates are sometimes undecipherable. From time to time they have been repaired but their condition had grown to be such that they urgently needed attention and during the summer fresh labels were put on all of the volumes with name and date plainly printed, and for convenience in the future shelf examinations accession numbers were also printed on the backs. This large and important piece of work took time and necessitated the help of the janitor in handling the heavy volumes. But it will do away with much burdensome opening of them.

In spite of the limited time that may be given to the Room no visitors needing help have failed to receive prompt and efficient service and all enquiries by letter have been answered with as much fulness of detail as it was possible to give.

GIFTS

As in former years, the library has been the beneficiary of the Government, the State, religious bodies, societies, study clubs, its own city, and cities outside of New Hampshire, and individuals. This has added materially to its resources.

Early in September it shared in a gift, a memorial to the late Edward Sawyer, formerly of Dover, offered through the Yale University Press. Twenty-nine volumes and one hundred and eighty photographs were purchased from the Yale University Press, half of the amount of the bill being paid from a fund furnished by a donor in memory of Mr. Sawyer. The photographs by Samuel Chamberlain were a valuable addition to the library's picture collection, and the books increased its volumes of a scholarly character.

Noteworthy among other gifts were twenty volumes of general literature, and a large framed photo-

graph of Dover Neck, from Mrs. Alden S. Hatch; The Dover Woman's Scrapbook for 1936-1937; The Music of the World in 27 parts, edited by Anton Seidl and presented by Mr. Edmund Cordes; a sum of money for the purchase of a desirable book from Miss Francis Hyde, a former Dover school nurse; and, especially welcome, twelve volumes of general interest from the Catholic Daughters of America Study Club, among which were some of the most important publications of the year.

IMPROVEMENTS AND NEEDS

Two welcome changes in the equipment were made in the spring. A new heating plant was installed, thus doing away with dependence on heat from the High School; and a new Royal Typewriter was bought to replace the one that had seen many years of service.

In order to make room for the heating plant which had to be placed in the Public Document Room some of the book stacks had to be moved and shelves had to be taken down and rebuilt in another room. This necessitated the transference of a large number of Public Documents. The moving was done most expeditiously and the change in the heating system which made possible a better control of the heat in the building has been greatly to the advantage of the library. The typewriter has facilitated the clerical work in the Historical Room.

As was mentioned in an earlier report an improvement was made in the lighting of several rooms by the lowering of the central overhead lights. But there is still need in the Reading Room of some further change. The table lights, which were of the most approved type when they were installed are now in need of frequent repair. The cross arms of the fixtures are twisted by readers until they get out of order and the services of an electrician become necessary. If these fixtures could

be done away with and adequate indirect lighting be provided, the more modern system would be of much benefit to all those who use the room.

A further need of better lighting which calls for consideration exists outside the building. The main approach to the library is uncomfortably dark at night. An additional light on this part of the grounds would meet with general appreciation.

In closing her report the librarian wishes to express for herself and her assistants their sincere appreciation of the action taken by the trustees in granting an increase of salaries, and to thank them for this and other evidences of their interest and kindness.

She also wishes to acknowledge the fine spirit and quality of work of the assistants.

Respectfully submitted,

BEATRICE M. G. JENKINS,

Librarian.

Gravel resurfacing (Tar Binder) -- 40½ yards gravel,
12 yards sand, 450 gallons tar. Material and labor
cost, \$112.85.

Fern Street:

Gravel resurfacing (Tar Binder -- 28 yards gravel, 4 yards sand, 350 gallons tar. Material and labor cost, \$81.62.

Horne Street (Hough to Redden Street) :

Gravel construction (Tar Binder) -- 654½ yards gravel, 42 yards sand, 2329 gallons tar. Material and labor cost, \$731.35.

Culvert extended :

30 feet 20 in. Akron Pipe, 36 feet 8 in. Galv. Pipe.

Clifford Street:

Gravel construction (Tar Binder) -- 30 yards sand, 284 gravel. 1301 gallons tar. Material and labor cost, \$289.45.

Watson Street:

Gravel construction (Tar Binder) -- 571½ yards sand, 639 yards gravel, 2041 gallons tar. Material and labor cost, \$687.13.

Watson Lane:

Gravel construction (Tar Binder) -- 251½ yards sand, 1741½ yards gravel, 1866 gallons tar. Material and labor cost, \$360.75.

Portland Street (Main Street to Portland Avenue) :

Gravel construction (Tar Binder) -- 165 yards gravel, 74 yards sand, 3180 gallons tar. Material and labor cost, \$679.00.

Freeman Street:

Gravel resurfacing (Tar Binder) -- 6 yards sand, 43 yards gravel, 200 gallons tar. Material and labor cost, \$65.94.

East Concord Street:

Gravel resurfacing -- 1471½ yards gravel. Material and labor cost, \$157.78.

Coolidge Avenue:

Gravel resurfacing (Tar Binder) -- 12 yards sand, 21 yards gravel, 525 gallons tar. Material and labor cost, \$115.16.

Mt. Vernon Street:

Gravel resurfacing (Tar Binder) -- 76 yards gravel, 12 yards sand, 940 gallons tar. Material and labor cost, \$235.12.

Angle Street:

Gravel resurfacing (Tar Binder) -- 6 yards sand, 24 yards gravel, 150 gallons tar. (Sidewalk graded) Material and labor cost, \$85.25.

Middle Street:

Gravel resurfacing (Tar Binder) -- 15 yards sand, 10½ yards gravel, 480 gallons tar. Material and labor cost, \$93.86.

Chestnut Street: B & M RR. to First Street.

Gravel resurfacing (Tar Binder) -- 192 yards gravel, 32 yards sand, 1020 gallons tar. Material and labor cost, \$316.97.

Florence Street:

Gravel resurfacing -- 24 yards gravel. Material and labor cost, \$30.04.

Pearl (Perl) Street:

Gravel resurfacing (Tar Binder) -- 20 yards sand, 50 yards gravel, 864 gallons tar. Material and labor cost, \$153.02.

Fourth Street:

Gravel resurfacing -- 56 yards gravel. Material and labor cost, \$33.76.

D. P. Middle Road:

Widening shoulders -- 180 yards gravel. Material and labor cost, \$79.81.

Three Rivers Road:

Gravel resurfacing -- 731½ yards gravel. Material and labor cost, \$63.89.

Cushing Court:

Gravel resurfacing -- 30 yards gravel. Material and labor cost, \$27.34.

Columbus Avenue:

Gravel resurfacing -- 279 yards gravel. Material and labor cost, \$181.53.

Portland Avenue: Hancock Street to Portland Street.

Asphalt shoulders repaired -- 35 yards sand, 18 yards gravel, 710 gallons Binder. Material and labor cost, \$149.89.

Arch Street:

Gravel resurfacing -- 38 yards gravel. Material and labor cost, \$74.40.

Oak Street: Broadway to Portland Avenue.

Gravel resurfacing (Tar Binder) -- 911½ yards gravel, 32 yards sand, 1400 gallons tar. Material and labor cost, \$330.90.

Eliot Bridge Road:

Gravel resurfacing (Tar Binder) -- 175 yards gravel, 9 yards sand, 400 gallons tar. Material and labor cost, \$280.83.

Third Street, Grove Street, Lincoln Street:

Gravel resurfacing (Tar Binder) -- 231 yards gravel, 371½ yards sand, 1933 gallons tar. Material and labor cost, \$620.09.

Cocheco Street:

Gravel resurfacing -- 37 yards gravel. Material and labor cost, \$29.39.

Prospect Street:

Gravel resurfacing -- 27 yards gravel. Material and labor cost, 26.05.

William Street:

Gravel resurfacing -- 28½ yards gravel. Material and labor cost, \$28.57.

Burnham & Demeritt Court:

Gravel resurfacing -- 9½ yards gravel. Material and labor cost, \$18.15.

GRAVEL CONSTRUCTION

Waldron Street: Central Avenue to Walnut Street.

Excavation, 752 cubic yards; gravel base, 752 cubic yards; Gravel surface, 44 loads -- 99½ cubic yards; sand, 10 loads -- 37 cubic yards; tar binder, 1170 gallons. Total cost, \$929.22.

In connection with the above work, a replacement of 100 feet 12 in. Akron pipe was made; 380 feet granite curbing reset; and 410 linear feet of 2 in. creosoted wood curbing was laid. Cost, labor and material, \$272.64.

Sawyers Bridge:

Resurfaced with Type F. mixture; 13 tons Type F. used. Total cost, labor and material, \$124.88.

Kirkland Street:

Gravel resurfacing -- loads, 6; cubic yards, 12. Material and labor cost, \$39.61.

Eliot-Bridge Road:

Gravel resurfacing -- loads, 10; cubic yards, 20.

Material and labor, \$20.84; ledge blown out -- cost, \$13.08; total cost, \$33.92.

Brookline Avenue:

Gravel resurfacing -- 75½ yards gravel. Material and labor cost, \$61.78.

Fourth Street:

Gravel resurfacing -- 18 yards stone, 133 yards gravel,
31 yards sand. Material and labor cost, \$199.74.

Spruce Lane and Mast Road:

Gravel resurfacing -- 333 yards gravel. Material and
labor cost, \$226.38.

Portland Avenue:

Guard rails repaired. Material and labor cost, \$5.15.

Hanson Street:

Guard rails repaired. Material and labor cost, \$6.76.

Eliot Bridge:

Guard rails repaired. Labor, \$7.30.

HIGHWAY MAINTENANCE

804 loads -- 1737 yards -- gravel.

34 loads -- 59 yards -- cinders.

Material and labor cost, \$1,566.49.

Grader -- labor, \$204.43.

Material and labor cost, \$32.65.

Hough Street -- Culvert repaired:

Stone.

Material and labor cost, \$46.74.

Eliot Bridge inspected and repaired:

3858 ft. 3 in. plank used.

Labor cost, \$173.84; material cost, \$264.96; inspection cost, \$174.74; or a total cost of \$613.54.

Bellamy Bridge replanked:

4523 ft. 4 in. Creosoted plank.

Labor cost, \$57.80; Material cost, \$383.33; or a total cost of \$441.13.

Fresh Creek Bridge repaired:

Material and labor cost, \$10.23.

Watson Bridge repaired:

192 ft. 2 in. Creosoted Plank.

Material and labor cost, \$15.27.

HIGHWAY MAINTENANCE

Premix asphalt -- patching:

22 tons premix, \$110.00; labor, \$53.00; total, \$163.00.

K. P. cold patching:

522½ batches. 7055 gallons K. P.

Material cost, \$1,002.02; labor cost, \$1,216.84; or a total cost of \$2,218.86.

Cut back asphalt patching:

350 gallons.

Material and labor cost, \$63.52.

Emulsion patching:

3490 gallons. 75 yards sand.

Material and labor cost, \$1,086.57.

Calcium Chloride used as a dust layer:

94 bags used.

Material and labor cost, \$196.48.

On Bellamy Road, Old Rochester Road, Washington Street, Fifth Street, Ela Street, Varney Street.

Crack patching or seam patching (asphalt streets):

285 gallons asphalt.

Material and labor cost, \$155.45.

CLEANING UP LEAVES

318 loads hauled off. Labor cost, \$469.40.

CATCH BASINS WERE CLEANED

60 loads hauled off away. Labor cost, \$438.80.

GUTTER CLEANING

59 loads hauled off. Labor cost, \$198.69.

In the construction of the Eliot Bridge Road (Rollins' Hill), a stone drainage ditch with laterals was put in. 64 loads or 152 cubic yards of stone were used.

Material and labor cost, \$425.90.

CATCH BASINS -- NEW AND REPAIRED

Catch basins repaired:

Myrtle street, 1; Forest Street, 2; Florence Street, 2; Broadway, 3; Portland Street, 3; Grove Street, 2; Washington Street, 1; St. Thomas Street, 1; Waldron Street, 2; School Street, 1; Horne Street, 1; Locust Street, 1; Central Avenue, 2; Hill Street, 1; Atkinson Street, 1; Walnut Street, 1; Kealty Street, 2; Locke Street, 4.

Material and labor cost, \$186.49.

Repaired:

Atkinson Street, 1 -- \$17.24.

Fifth Street, 3 -- \$66.76.

Total cost, \$84.00.

New:

Washington Street, 2 -- \$74.77.

Horne Street, 2 -- \$77.41.

Coolidge Avenue 2 -- \$93.30.

Central Avenue, 1 -- \$59.02.

Highland Avenue, 1 -- \$44.06.

Prospect Street, 1 -- \$47.61.

Total cost, \$396.17.

Rebuilt:

Chestnut Street, 1 -- \$42.67.

Pierce Street, 1 -- \$20.93.

Total cost, \$63.60.

New tops:

Kealty & Locke Streets, 6 -- \$72.60.

Catch basins trapped:

Third Street, 6 -- \$35.44.

CULVERTS

County Farm Road:

Culvert No. 1:

Cement header.

Material and labor cost, \$59.45.

Culvert No. 2:

Cement header.

Material and labor cost, \$21.44.

Culvert No. 3;

Cement header.

Material and labor cost, \$58.99.

Cocheco Road:

Culvert extended.

6 ft. 8in. Akron Pipe.

Material and labor cost, \$5.88.

Oak Street:

Culvert repaired.

Material and labor cost, \$12.19.

SIDEWALK MAINTENANCE

Cinders, 181 loads or $314\frac{1}{2}$ yards.Sand, 1 load or $11\frac{1}{2}$ yards.Asphalt, $2\frac{1}{2}$ batches \$6.87

Labor, \$263.09.

Silver and St. Thomas Streets:

Brick maintenance relay.

Sand 1-1

Brick 75

Labor, \$16.11.

Washington Street:

Relay brick.

Brick 1700

Material and labor, \$54.02.

CURB OR EDGESTONE

Removed from Portland Avenue and Central Avenue
and reset on Broadway (102 ft.) \$54.20

CATCH BASIN MARKERS

Placed and removed.

Labor, \$43.97.

GRAVEL MAINTENANCE

Gravel, 38 loads -- $73\frac{1}{2}$ yards.

Labor and material, \$63.89.

NEW SEWER CONSTRUCTION

Locust Street:

Washington Street to Hale Street.

352 ft. 30 in. Akron Pipe, Washington Street to St. Thomas Street.

214 ft. 24 in. Akron Pipe, St. Thomas Street to Hale Street.

4 new manholes were put in. This sewer will now relieve the conjection at the junction of the Kirkland Street and Locust Street sewers.

Total cost, material and labor, \$4,401.43.

Washington Street:

Highland Street to Prospect Street.

An overflow sewer was constructed to relieve the backing up of Washington Street sewer.

253 ft. 10 in. Akron Pipe was used and 2 new catch basins put in.

Total cost, material and labor, \$327.47.

Sewers flushed out on the following streets:

Arch, Forest, Washington, Horne, Elm, Hill, Ham, Fourth, Waldron, Myrtle, Munroe, Winter, Third, Park, Chestnut, Atkinson, Elmwood Avenue, Franklin Court.

Towle Avenue:

New manhole.

Material and labor cost, \$68.00

Sewers repaired:

Williams Street, \$20.30; Richmond Street, \$43.03; Grove Street, \$9.47; St. John Street, \$6.63; Fisher Street, \$13.75; Atkinson Street, \$19.29; Third Street, \$26.35; Portland Street, \$48.78; Munroe Street, \$22.98; Washington Street, \$6.65; Park Street, \$40.11; Ham Street, \$4.05; Fifth Street, \$12.00; Rose Street, \$5.06.

Third Street to Cocheco River:

Extension was made from the culvert under the B & M RR. tracks to the river, this part of the sewer formerly ran into an open ditch.

138 ft. of 12 in. Akron Pipe was used.

Total cost, material and labor, \$156.43.

Birch Wood Avenue sewer extension:

108 ft. 8 in. Akron Pipe.

Labor and material cost, \$77.50.

Fifth Street sewer replacement:

142 ft. old cement pipe was replaced by new 8 in. Akron Pipe.

One new catch basin built.

One catch basin repaired.

Labor and material cost, \$380.62.

Mt. Vernon Street sewer extension:

18 ft. 8 in. Akron Pipe used.

Labor and material cost, \$54.13.

SEWER MAINTENANCE

Washington Street at B & M RR. crossing surface water sewer extended by 44 ft. 8 in. Akron Pipe, repaired with 4 ft. 18 in. Akron Pipe.

Labor and material cost, \$51.31.

SEWERS -- W. P. A. PROJECTS

Project No. 323:

Bellamy Sewer so-called.

This sewer has been completed starting at the junction of Rutland Street and Cataract Avenue, running by way of Cataract Avenue to Bellamy Road to the Knox Marsh Road to Silver Street. This project was started in 1936 and completed in 1937.

Project No. 1016:

Horne Street Sewer.

Starting at Ash Street, running north 382 ft. to Redden Street, from Ash Street to near Hough Street.

522 ft. 8 in. Akron Pipe.

2 manholes and 5 catch basins were put in.

Project No. 1106:

River Street Sewer.

This is an extension of the main Truck Line. Being extended 68 ft. in the river by 48 in. RFC Pipe with a 79 lin. ft. cement header at the outlet.

Project No. 1296:

This sewer was extended from Fourth Street to near Whittier Street.

1500 ft. of 8 in. Akron Pipe was used.

3 manholes and 4 catch basins were put in.

Project No. 1190- No. 1310:

Grove and Hough Streets.

This is a surface water sewer, starting at Maple Street, extending on Hough Street to Grove Street, and on Grove Street to Ash Street.

1500 ft. 18 in. Akron Pipe was used.

4 manholes and 4 catch basins were put in, and 2 lateral drains.

HIGHWAY MAINTENANCE

Fifth Street (Chestnut to Grove)

Scarifying and regrading. \$66.37.

STATE HIGHWAY AID

A black top gravel road has been built from the Grange Hall to the Rochester Line. In building this road, a new cement bridge was built replacing the wooden bridge over the Black Water Brook. This road is now

complete from the junction of Sixth Street and the County Farm Road to the Rochester Line.

Dover contributed: Road, \$3,700.00; bridge, \$2,000.00.

PERMANENT ROAD CONSTRUCTION

Cement streets were built on Washington Street from the Lower Square to the B & M RR., tracks and on Central Avenue (South Side) from the junction of Stark Avenue and Central Avenue to the Sawyer Bridge.

REPAIRS CITY FARM BUILDINGS

Tractor shed:

Labor and material cost, \$43.08.

New horse stalls:

Labor and material cost, \$56.27.

WINTER MAINTENANCE

Sand stored at City Barn for Winter use:

271 loads. 673½ yards.

Labor cost, \$473.32.

Sanding -- sidewalks and highways:

219 loads. 427 yards.

Labor and material cost, \$993.86.

Breaking our highways

Breaking our sidewalks

Snow removal

Extra trucks

Sanding highways and sidewalks

Storing sand

Cleaning catch basins

Labor cost, \$4,708.95.

From the foregoing report it can readily be seen that a great deal has been accomplished during this past year. Many new streets and sidewalks have been reconstructed or repaired, but there is still a great deal left to be done however. We are having considerable trouble with the old sand and cement sewer pipes that were laid over fifty years ago in many sections of the city. Constant flow of sewage through them has worn the bottoms through and in many places the whole pipe has deteriorated and crumbled. It is not until this occurs and the sewage backs up into a nearby cellar that the unfortunate abutter realizes the necessity of keeping these underground services in a proper condition. The department is constantly occupied with digging up the streets in order to repair these old sewers. From the knowledge gained through this experience we conclude that in the very near future a large amount of money will have to be expended on relaying these old sewers which run under some of the main streets of our city.

One of the greatest items of waste that I have found in this department is a necessity of continually repairing streets which have no foundation. In certain sections of the city the sub-soil is entirely of clay which is perhaps the greatest handicap to good roads. In my 1936 annual report I mentioned this condition, but I think it important enough to reiterate my position here. Unless a sufficient amount of good gravel is placed between the surface of the road and this clay, thousands of dollars can be spent each year on a surface which will be just as bad the next spring as it was before the money was expended on it. When the motorist finds roads in this city with the surface all broken and the clay boiling through he can blame it on this condition.

On roads in outside districts gravel foundations can be laid over the old road without excavation, but on city streets this is impossible. During the past year I

had the opportunity of having some of our streets excavated with a power shovel and good gravel foundations laid. These streets were then given the same treatment of tar that was put on other streets that had not been excavated. The former are now in good condition while the latter have broken up. With the present equipment in the department it is not possible to lay proper foundations on our streets. If the work is done by hand labor, the annual appropriations are not great enough to meet the cost. One of the arguments against the power shovel is that it does away with manual labor. The argument is unsound. The department has only a limited amount to spend each year but it has an unlimited amount to do. The amount of money appropriated necessarily limits the number of men that can be employed. If half of these men are put to work in a gravel bank to load trucks they can not be doing other useful work and so that other work just doesn't get done. The cost of hauling gravel with hand labor is many times greater than with a shovel. Take one example. We must figure \$1.25 an hour for the use of trucks. With hand labor these trucks lay idle from twenty to thirty minutes out of each hour while they are being loaded. This is a waste of between \$0.41½ and \$0.62½ cents an hour on every one of the trucks alone without considering the waste due to tying up men that could be used elsewhere. Over a period of a year this amounts to an unbelievable sum and with this saved more men could be employed for other purposes.

In private enterprise machinery might throw men out of work because the idea there is to get a limited amount of work done as cheaply as possible. In my department the idea is to do as much as possible for the money appropriated. Some of the work must be done by hand. For instance, the laying of sidewalks. While men are needlessly working in a gravel pit at a great waste they cannot be laying sidewalks. Our country

roads are nearly all in need of gravel, but again the cost of doing it with hand labor is prohibitive.

The purchase of a shovel should interest those who wish a reduction of taxes. With a shovel we could put gravel foundations under our streets and after a few years it would not be necessary to expend so much on repairs and the appropriation could be reduced accordingly. By elimination of present waste a shovel will pay for itself in about two years' time.

I cannot emphasize too strongly the need of this piece of equipment. I believe that it is perhaps the greatest need of the city at the present time. Therefore, in the name of economy, efficiency, lower taxes and better roads I most earnestly recommend the purchase of a power shovel for my department.

It is my intention in the future to carry out my practice of constructing as many new streets with good solid foundations as possible and at the same time have a little money left to build more good sidewalks for those who have so long been neglected. It will be many years before all the streets are in good shape, but every year we are getting nearer to our goal.

We are making progress, make no mistake about that, but it will take time and we must have patience and faith. I ask and hope that the citizens will continue to have faith in me.

Respectfully submitted,

FRANK J. GRIMES,

Street Commissioner.

REPORT OF THE BOARD OF TRUSTEES OF THE WENTWORTH HOSPITAL

GENTLEMEN OF THE CITY COUNCILS:

We have the honor to submit herewith the thirty-second annual report of the Board of Trustees of the Wentworth Hospital for the fiscal year ending December 31, 1937.

STATISTICAL

The following statistical tables submitted to give you some conception of the number and type of cases handled and the great amount of charitable work done by this institution:

TABLE I

Year	Patients Admitted	Accident Cases	Emergency Cases	Ambulance Cases	Per cent Accident and Emergency Cases
1906	75	3	6	15	12.0
1907	307	40	25	49	21.2
1908	338	32	22	43	16.0
1909	325	51	48	42	30.5
1910	400	50	63	67	28.2
1911	421	41	35	66	18.0
1912	415	35	31	70	15.9
1913	466	75	56	52	28.0

THE WENTWORTH HOSPITAL

REPORT OF SUPERINTENDENT

TO THE BOARD OF TRUSTEES OF THE WENTWORTH
HOSPITAL, DOVER, NEW HAMPSHIRE:

It is my privilege to present the report of the Superintendent for the year 1937.

The following Statistical Table gives a brief synopsis of the work done:

Number of patients in hospital	29
Paying	25
Part pay	
Free	4
Total number of patients admitted from January 1, 1937, to January 1, 1938	1693
Number of paying patients	1236
Number of part pay patients	134
Number of free patients	323
<hr/>	
Total	1693
Total number of accidents	239
Number of emergencies	150
Number of ambulance patients	98
Number of deaths	60
Civic condition:	
Single	856
Married	734
Widowed	103
Total	1693

Conditions treated:

Medical	266	
Surgical	677	
Obstetrical	222	
Nose and Throat	229	
Ophthalmic and Aural	78	
Births	221	
Total		1693

Causes of death:

Appendicitis, acute perforated -- general peritonitis	2
Appendicitis, acute with peritonitis -- bronchiectasis	1
Appendicitis, acute perforated, hemorrhage into the bowel wall -- general peritonitis	1
Appendicitis, acute perforated with peritonitis, intestinal obstruction	1
Adenocarcinoma of sigmoid	1
Bronchopneumonia -- marasmus	1
Bronchopneumonia -- chronic myocarditis -- pulmonary embolism	1
Carcinoma of cervix -- uremia	1
Carcinoma of liver	1
Carcinoma of transverse colon with metastasis to liver	1
Cerebral apoplexy	1
Cerebral embolism	3
Coronary artery disease	1
Coronary artery disease -- probable carcinoma of pancreas	1
Diabetic gangrene	1
Diabetes mellitus -- influenza	1
Duodenal ulcer -- pyloric stenosis	1
Encephalitis, chronic	1
Fibroid tumor, sub-peritoneal	1
Fracture of femur --diabetes mellitus	1

Fracture of femur -- general arterio-sclerosis . . .	1
Fracture of femur --chronic myocarditis	1
Fracture of skull -- concussion	1
Fracture of skull--concussion--lacerated wounds -- multiple abrasions and contusions	1
Fracture of spine with paralysis -- pyemia	1
Hypertension--hypertensive heart disease--vari- cose ulcer	1
Intracranial hemorrhage	3
Intracranial hemorrhage -- acute purulent otitis media	1
Intracranial hemorrhage -- fracture of radius . .	1
Intracranial hemorrhage -- neurasthenia -- mul- tiple dental abscess	1
Lobar pneumonia	5
Lobar pneumonia -- foreign body in bladder	1
Myocarditis, chronic	1
Myocarditis, chronic -- cardiac decompensation . .	1
Myocarditis, chronic arterio-sclerotic -- influenza	1
Monstrosity -- newborn infant	1
Nephritis, acute with edema	1
Nephritis, chronic -- adenomatous obstruction of prostrate	1
Otitis media, acute with mastoiditis, with Bez- old's abcess, diabetes mellitus	1
Paralytic ileus -- intestinal obstruction	1
Prematurity	2
Prematurity -- inanition	1
Poisoning, acute arsenic	1
Rupture of heart, spontaneous	1
Spina bifida -- Prematurity	1
Thrombosis femoral artery	2
Uremia -- chronic nephritis	1
Uremia, acute -- obstructing prostate, sclerotic	1
Undulant fever -- hypertension -- hypertensive heart disease	1

Condition of those discharged:

Recovered	981
Improved	566
Not improved	46
Not treated	10
In for diagnosis only	2
Deaths	60
*In hospital	29

Total 1694

Stillborn 8

Occupation of those admitted:

Advertiser	1	Cake finisher	1
Antique dealer	1	Caretaker	1
Asst. Credit Clerk ..	1	Carpenter	1
Asst. Manager	1	Chef	1
Asst. Postmaster ...	1	Chemist	1
At home	98	Child	97
Attendant	2	Clerk	15

Many of our difficult problems have been solved by the Installation of the New High Pressure Boilers and the Modern Laundry Plant which is now operating very successfully, making it possible for us to have sufficient clean linen on hand always. The saving of expense we shall realize from this department will greatly prove the wisdom of the erection of such a Plant.

The Incinerator, which has just been completed, will also prove an added convenience, doing away with much of the debris and odor immediately.

Two new Electrical Refrigerators have replaced some of the old wooden ice boxes, Electrical fans have been installed in the Diet Kitchens doing away with the steam and heat, thus adding comfort to the busy nurses while working there.

To our Training School staff has been added a full time Director of Nursing and a Practical Instructor. We expect to admit larger classes of Student Nurses, and will at the end of three years give them the graduating exercises they so rightly deserve.

In conclusion, I wish to thank the Board of Trustees, Medical Staff, and those under my jurisdiction for their whole-hearted and generous support, without which I shall be unable to carry on this difficult and most interesting work.

Respectfully submitted,

KATHERINE C. HALL, R. N.

Superintendent.

GRADUATES OF THE WENTWORTH HOSPITAL
TRAINING SCHOOL

1908—Alicia V. Wilson.

1909—Rosabelle Bartlett (Mrs. James Walker), Beatrice Page, Louise V. Durgin, Bessie A. Cawley, Sarah B. Chapman (Mrs. Robert Kirk).

1910—*Adalia E. Hanley, Bernice Spinney, Mabel Trefry (Mrs. Alexander Walker), Helena Holland, *Esther Anderson.

1911—Effie Knowles (Mrs. Porter), *Mary F. McLaughlin.

1912—*Margaret Moran, Fannie Rockwood (Mrs. William Whitcomb).

1913—Lena N. Murphy, Merle Renshaw (Mrs. Charles Lord).

1914—Mary A. Merserve (Mrs. Harry Berry), *Miss Katherine Mahoney, Pearle G. Pond.

1915—*Kathryn Floyd, Sylvia J. Ellis (Mrs. Snyder), Effie VanBuskirk, Eva VanBuskirk, Sadie M. Feyler, Ethel Curtice (Mrs. George Lamberton).

1916—Lillian Wyman (Mrs. Grocut), Isabelle Carney (Mrs. Ralph Matthews), Mildred Brown (Mrs. Harvey Newton).

1917—Mildred Meserve (Mrs. John Curley).

1918—Mildred J. Mitchell, Gladys York (Mrs. Weeks), Tilly Carton (Mrs. Harry McInnerney), Vina Hayden (Mrs. Gorman), Rhoda Gaskell (Mrs. Thomas Comiskey), Arline Silk (Mrs. Peterson), Nora Ryan (Mrs. Hugh Miller).

1919—Annie E. Boies (Mrs. Festus Fairley), Annie A. Redmond (Mrs. James Upham), Edith V. Larson (Mrs. Cassidy), Jean Webster, Edna V. Spinney (Mrs. John Cann).

1920—Helen Goggin, Alice Carlson (Mrs. John Brown), Gertrude Constine (Mrs. Theodore Ratte), Mary Louise McKiel (Mrs. Fred Small).

1921—*Hilda McClintock (Mrs. Finnegan), Gertrude Brown (Mrs. Knowlton Locke).

1922—Viola Scarr (Mrs. Ernest Wadsworth), Sadie B. Estey, Dorothy A. Price (Mrs. Edward Frost), Elma E. Hovey (Mrs. Warr).

1923—Averil O. Brown, Mary A. Snow (Mrs. Clifford Dyer), *Bessie MacDonald, Margaret Reynolds (Mrs. Flobert Berry).

1924—Hazel Hunter (Mrs. Coates), Olivia J. Snow (Mrs. Maurice Kidney), Helen K. Pond (Mrs. McNulty), Marguerite Ferguson, Esther Hanscom, Mary Glomb (Mrs. Stanley Herman), Clara Wentworth (Mrs. James Quirk).

1925—Doris MacLennan (Mrs. McAweeney), Clara Merrill (Mrs. Ellis Corson), Ina Stewart (Mrs. Lyons).

1926—Mildred Illingworth (Mrs. Samuel Stevens), Vilda Joy (Mrs. Eugene Riekert), Thelma Seavey (Mrs. Charles Gordon), Maud McBride, Ina Flynn (Mrs. Donald Harriman), Evelyn Dow (Mrs. Frank Evans), Doris Bennett (Mrs. Donald Arnold), Ruby McKeon (Mrs. Charles Peck).

1927—Marie G. Wilson (Mrs. Furenholman), Lillian Seymour, Josephine Griffin, Anna Mone (Mrs. Chester Cotton), Mary Maloney (Mrs. Costigan), Marion Holt, Marion Sherry.

1928—Marie Estey (Mrs. Harold Sterling), Gertrude Grimes (Mrs. John Hickey), Ferne Calhoun (Mrs. Carl Riekert), Ruby Snow, Ruth Hammond (Mrs. Tenke, Jr.), Henrietta Lyons, Marion Walsh (Mrs. Brauner), Ella Walls.

1929—Pearle Lyons (Mrs. Smith), Helen Brierly (Mrs. James Kidney), Barbara Mastic (Mrs. Cecil Allen).

1930—Jean Calhoun (Mrs. Fred Perkins), Marguerite Dawson, Mary McIntosh (Mrs. John Randall), *Bernadette Lucey, Mary Prescott, Gertrude Hinchey (Mrs. Joseph Green), Doris Nixon (Mrs. Calcutt), Josephine Hunter (Mrs. Lewis Spates), Cecile Brown (Mrs. William Bernard), Echo Noyes (Mrs. Harry Davis), Vera Calhoun (Mrs. Thomas Sowerby).

1931—Elizabeth Clark, Glenna Estey (Mrs. Buchanan), Evelyn Shea (Mrs. William Stalnaker), Laura Abbott, Mary E. Kay (Mrs. P. Doyle), Maxine Nesbitt, Della M. Hinchey (Mrs. Herbert Durgin).

1932—Helen Caswell (Mrs. Irving Tinker), Lesley Hoitt, Irene Noel, Hazel Harvey.

1933—Cecelia McCabe, Etta Renshaw, Amy Dixon, Louise Mathews (Mrs. Bernard Livingston), Katherine Ham (Mrs. Albert Tessier), Edna White, Sadie Burke, Rose Harkins, Bernadette Luneau (Mrs. Blood), Alice Brierly, Mary Green, Thelma Strout, *Rose Eschman (Mrs. Dexter).

1934—Blanche Morisette (Mrs. Joseph Parent).

1935—Irene Paul, Harriet Berg (Mrs. Clayton Nason), Jerrine Beaudoin.

1936—Phyllis Mathews, Esther MacBrien, Margaret Grant, Eleanor Eyres, Johanna Graffert, Catherine Cavanaugh (Mrs. Charles Dooley), Margaret Cegiel.

1937—Anne Sewall, Pauline Hull, Alberta Beckman, Gene Shannon.

*Deceased.
